**The Philosophical Investor**-Gary Carmell 2015-03-17 Living in Southern California, Gary Carmell has become very familiar with tectonic shifts: cataclysmic changes in the earth's crust that cause earthquakes and tsunamis. Carmell has also experienced numerous tectonic shifts in the economic landscape in his nearly thirty-year investing career. Correctly anticipating economic trends has allowed his real estate investment and management firm, CWS Capital Partners LLC, to grow from assets of \$250 million in the late 1980s to over \$3 billion today. CWS foresaw the collapse of manufactured housing in the late 1990s and anticipated a massive shift

from homeownership to renting, prompting them to reposition aggressively for growth in apartment construction and management. Carmell feels special pride in the results his company's delivers for its investors, as a result—long-term average annual returns exceed 13 percent—even during the Great Recession of 2007-2009. Navigating turbulent economic markets and experiencing his two-year-old son's near-fatal stroke has taught Carmell that real success requires not only financial acumen, but also deep reflection. He credits Shakespeare, Hume, and Schopenhauer as his mentors, with more modern sages like Buffett, Soros, and Munger also guiding his actions. In *The Philosophical Investor: From Wisdom to Wealth*, he shares the insights he has gained along the way in the hope of inspiring a new cadre of critical thinking investors.

**Go Like Hell**-A. J. Baime 2010-06-17 The epic story also told in the film *FORD V. FERRARI*: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. *Go Like Hell* tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. *Go Like Hell* transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they

built, and the "pilots" who would drive them to victory, or doom.
