Spirit of the Stone

-Kelly Peasgood 2016-12-30 Two thousand years after the Jewel of Peace ended the devastating Wizard Wars, chaos stalks the land again. The tyrant Broman lusts to take up the Stone and twist the world into his personal plaything. The Wizard Ord desires to find the Spirit that can control the weapon and manipulate it to his will. It falls to the humble mountaineer Geret to take up the mantle of a millenia-old battle and tame the Spirit he unwittingly inherits. As war savages the land anew and pits nation against nation, hope hangs by the thinnest thread; a mountaineer with Spirit against a centuries-old Wizard willing to use the Stone to smash the world asunder.

Making Sense of World History-Rick Szostak 2020-10-23 Making Sense of World History is a comprehensive and accessible textbook that

helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. Figuring Poesis-Evans Lansing Smith 1997 Figuring Poesis focuses on the interrelations between myth and geometrical symbolism in literature since the end of the Second World War. Detailed readings of a wide range of works contextualize allusions to the myths of the apocalypse, the great goddess, alchemy, the labyrinth, and the descent to the underworld. The geometrical symbols that occur in conjunction with these myths serve as images of poesis and hermeneusis. The conclusion brings postmodernist paintings and architecture into the discussion, and develops an iconography of form.

Nations Under God-Luke M Herrington 2015-08-16 'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics. Contributors: Stephen Dawson, Jodok Troy, Gertjan Dijkink, John A. Teaching about American Federal Democracy-Temple University. Center for the Study of Federalism 1986 Ten essays discuss federal democracy, the form of government of the United States. The first essay discusses the origins of American federalism. The second examines why we have a federal system, the functions federalism serves, and the consequences of federalism for the American political system. Federalism in the Constitution and constitutional law are treated in the third essay. The importance of cultural pluralism in American life and the role of American federalism in supporting pluralism are the foci of the fourth essay. The roles that the local community, the states, and political parties play in the federal system are examined in essays 5, 6, and 7, respectively. State, local, and professional roles in citizenship education are discussed in the eighth essay. The ninth essay explores how high school U.S. history and government textbooks approach federalism. The concluding essay describes resources on federalism that can be used in curriculum development at the secondary and college levels. Many of the essays are followed by topics for further study and suggested readings for teachers. (RM)
