The Campaigns of Napoleon Bonaparte of 1796-1797 Against Austria and Sardinia in Italy-Gustav Joseph Fiebeger 2010-06 An expert examination of the first campaigns of a military genius Gustav Fiebeger has approached his analysis of General Bonaparte's campaign of 1796-7 in Italy against Austrian and Sardinian forces on several levels. His book concentrates on delivering as much information as possible in the fewest words, so this a work of little literary style. Nevertheless, few relevant issues escape the author's attention here as he critically examines the opposing commanders, the political background to events, the strategic and tactical movement of troops, configurations of the armies, Napoleons own comments and the military situations and outcomes of conflict. The causes of Napoleon's success are examined in the conclusion of this work which will be an invaluable companion piece to any study of the early wars of the Napoleonic age and victories of

the French Revolutionary armies. Available in soft cover and hard cover with dust jacket.

Balthus-Stanislas Klossowski de Rola 2001 With the death of Balthus in February 2001, the world lost one of the great painters of the twentieth century. Born into an aristocratic Polish family in 1908, Balthus grew up amid the most cultivated and artistic circles of Geneva, Berlin and Paris. Brilliantly precocious, he developed early his twin fascinations with the East and with Europe's old masters - inspirations that show in the poise and peculiar timelessness of his paintings. But

his work is also suffused with an eroticism and sense of mystery that betray much more modern influences. Balthus was an artist of unflinching integrity. Out of step with the modern movement, until the 1960s he was hailed by only a tiny group of connoisseurs - among them, Picasso. By the mid- 1980s his work had achieved international renown, but he remained acutely wary of public scrutiny. He believed passionately that his paintings were to be looked at, not read about, or read into. As a result the enigmatic aura of his art came to envelop the man himself - even when, in his later years, he finally let down his guard and allowed journalists and scholars into his magnificent chalet home at Rossiniere in the Swiss Alps. Following his father's de

After a thirty year career in public transportation operations and executive leadership, he now travels the globe hearing directly from our top CEOs on what's working, what's not and what's next. If anyone can pull together a compendium on the Future of Public Transportation, it's Paul and he's done so in this book. Congrats!" - Erinn Pinkerton, President and CEO of BC Transit. "With Paul's long and distinguished career in transportation as well as his current involvement in mobility through his podcast Transit Unplugged and other thought

leadership, Paul is uniquely positioned to provide a clear eyed and expert view on the future of public transportation and what we as concerned stakeholders should be thinking about."-Blair Schlecter, VP of Economic Development and Govt. Affairs, Beverly Hills Chamber of Commerce "As a 38 year public transportation industry veteran, and former CEO and Chair of APTA, I can say that technology and mobility is adapting faster than ever to societal demands and technological abilities. Paul Comfort has his finger on the pulse of these fast changing developments and has pulled together for this book a top notch roster of executives from the public and private sector to provide their input."- Peter Varga, Former Chair American Public Transportation Association (APTA). This new book "The Future of Public Transportation" is written by transit industry leader Paul Comfort and over forty top public transport leaders, CEOs, futurists and associations. The book examines the transformations coming this decade for cities and the public transportation systems that serve them allowing readers to become more

informed and ready for these changes. In the next few years technology enhancements will produce and expand game changing new mobility options such as autonomous vehicles on regular bus routes and Mobility-as-a-Service (MaaS) smart phone apps allowing passengers to plan, pay for and subscribe to a full menu of traditional public transit and private microtransit options for their travel. Cities will further regulate and optimize the rampant expansion of e-bikes and e-scooters. Mobile public transit fare paying options will expand including allowing the use of not only cell phone and tap and go credit cards but even wearable fare payment jewelry and watches. Traditional transit systems are rebooting their bus networks, adding in high frequency routes & reducing the friction that slows their buses by adding bus only lanes, transit signal priority (TSP) and electronic fare payment systems. TNCs have now entered the public mobility marketplace and are supplementing or replacing public transit services for many. Transit fleets are becoming greener shifting to zero emission fuels like

electric or hydrogen, large multi-national firms are transforming how we build and operate new rail and other capital projects through Public Private Partnerships (P3). Hyperloop and air taxis are looking more like science than fiction. Cities are becoming "smart" and eliminating traffic in the public square or charging for its usage in peak times. Most transit software is moving to the cloud and privately-owned electric automobiles could be the autonomous taxicabs of tomorrow. All these trends & innovations in technology and business models are explored in depth in this book with the collaboration of thought leaders, industry associations, CEOs and the major companies that are creating and utilizing them. In the end, bold leaders will take us to new horizons as they always have, but they will do so using modern technology to move us in ways we never thought possible, and in the process, eliminate barriers that have too long stood in the way of true mobility for all. And THAT is the Future of Public Transportation.

Tall Life-Dr Sam Lochner Phd 2016-05-24 This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

The Ethanol Papers-Marc J. Rauch 2020-01-10
In this brash and audacious debunking of the myths and manipulation that brought the world to oil addiction, alt fuel expert Marc J. Rauch brilliantly lays out how ethanol can change the planet for the better--and along the way helps us navigate the noise of petroleum advocates. The Ethanol Papers is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it

compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, The Ethanol Papers is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.
