Ray & Joan-Lisa Napoli

2016-11-15 The movie The Founder, starring Michael Keaton, focused the spotlight on Ray Kroc, the man who amassed a fortune as the chairman of McDonald's. But what about his wife Joan, the woman who became famous for giving away his fortune? Lisa Napoli tells the fascinating story behind the historic couple. Ray & Joan is a quintessentially American

tale of corporate intrigue and private passion: a struggling Mad Men-era salesman with a vision for a fast-food franchise that would become one of the world's most enduring brands, and a beautiful woman willing to risk her marriage and her reputation to promote controversial causes that touched her deeply. Ray Kroc was peddling franchises around the country for a fledgling hamburger stand in the 1950s—McDonald's, it was called—when he entered a St. Paul supper club and encountered a beautiful young piano player who would change his life forever. The attraction between Ray and Joan was instantaneous and instantly problematic. Yet even the fact that both were married to other people couldn't derail their roller coaster of a romance. To the outside world, Ray and Joan were happy, enormously rich, and giving. But privately, Joan was growing troubled over Ray's temper and dark secret, something she was reluctant to publicly reveal. Those close to them compared their relationship to that of Elizabeth Taylor and Richard Burton. And yet, this volatility

paved the way for Joan's transformation into one of the greatest philanthropists of our time. A force in the peace movement, she produced activist films, books, and music and ultimately gave away billions of dollars, including landmark gifts to the Salvation Army and NPR. Together, the two stories form a compelling portrait of the twentieth century: a story of big business, big love, and big giving.

Measure of Strength-

Caethes Faron 2012-10-01
Publicly, Jason Wadsworth is a young steel magnate. Privately, he is slowly unraveling. Grippled by depression, he is haunted by the memory of Kale, the slave he sold and the man who still holds his heart. Jason clings to his only source of comfort: the belief that he sent Kale away to a better life. As grim as Jason's life is, Kale has fared worse. Each day is a brutal struggle. All that keeps him going are memories of a happier time. When a chance meeting thrusts the two back together, they must try to find the strength to forgive, not only each other, but themselves. They have one chance to right the wrongs of the past, but it requires the strength to seek redemption in each other's arms. A strength both men may be too spent to summon. Measure of Strength is the sequel to

Measure of Devotion and contains adult language and sexual content.

Mass Effect-Lauren Cornell
2015-10-23 Essays, discussions, and image portfolios map the evolution of art forms engaged with the Internet. Since the turn of the millennium, the Internet has evolved from what was merely a new medium to a true mass medium—with a deeper and wider cultural reach, greater opportunities for distribution and collaboration, and more complex corporate and political realities. Mapping a loosely chronological series of formative arguments, developments, and happenings, Mass Effect provides an essential guide to understanding the dynamic and ongoing relationship between art and new technologies. Mass Effect brings together nearly forty contributions, including newly commissioned essays and reprints, image portfolios, and transcribed discussion panels and lectures that offer insights and reflections from a wide range of artists, curators, art historians, and bloggers. Among the topics examined are the use of commercial platforms for art

practice, what art means in an age of increasing surveillance, and questions surrounding such recent concepts as “postinternet.” Other contributions analyze and document particular works by the artists of And/Or Gallery, Cory Arcangel, DIS, Cao Fei, the Radical Software Group, and others. Mass Effect relaunches a publication series initiated by the MIT Press and the New Museum in 1984, which produced six defining volumes for the field of contemporary art. These new volumes will build on this historic partnership and reinvigorate the conversation around contemporary culture once again. Copublished with the New Museum of Contemporary Art, New York

Constantine Versus Christ-

Alistair Kee 2016-08-31
The subject of this book is politics and religion, the relationship between Constantine and Christianity. Something happened in the reign of the Emperor Constantine that transformed both politics and religion in Europe, and anyone who seeks to understand modern Christianity must analyze this

sumnoneyonline.com on

transformation and its consequences. The reign of Constantine is remembered as the victory of Christianity over the Roman Empire; the subtitle of the book indicates a more ominous assessment: "the triumph of ideology." Through a careful analysis of the sources, Dr. Kee argues that Constantine was not in fact a Christian and that the sign in which he conquered was not the cross of Christ but a political symbol of his own making. However, that is only the beginning of the story. For Constantine, religion was part of an imperial strategy, and the second part of this book shows just what that strategy was. Here is the development which marks a transition to a further stage, the way in which by using Christianity for his own ends, Constantine transformed it into something completely different. Constantine, Dr. Kee argues, along with his biographer and panegyrist Eusebius, succeeded in replacing the norms of Christ and the early church with the norms of imperial ideology. Why it has been previously thought that Constantine was a Christian is

not because what he believed was Christian, but because what he believed came to be called Christian. And that represents "the triumph of ideology."

Organometallic Chemistry-

E W Abel 2007-10-31

Organometallic chemistry is an interdisciplinary science which continues to grow at a rapid pace. Although there is continued interest in synthetic and structural studies the last decade has seen a growing interest in the potential of organometallic chemistry to provide answers to problems in catalysis synthetic organic chemistry and also in the development of new materials. This Specialist Periodical Report aims to reflect these current interests reviewing progress in theoretical organometallic chemistry, main group chemistry, the lanthanides and all aspects of transition metal chemistry. Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years

the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

Restructuring the Employment Relationship-Duncan Gallie 1998 This masterly new study presents the first large-scale empirical analysis of the changes in

British work experiences and employment relationships between the 1980s and 1990s. Drawing on the Employment in Britain survey a national survey providing the richest source of evidence to date about individuals' experience of employment it examines the impact of new technologies, the emergence of new management policies, the changing forms of employment contract, and the growth of job insecurity on people's experience of employment. The authors focus on the implications these developments have for the ways in which skills and work tasks have been changing, the nature of control at work, the degree of participation in decision-making, and the flexibility demanded at work. They assess whether there has been a tendency towards either a polarization or convergence of employment experiences between men and women, and between occupational classes. They offer fresh insight into how the changing quality of work in recent years has affected employee's involvement in their jobs and organizations,

the stress they experience at work, and the propensity for absenteeism and staff turnover. While the study provides strong evidence of a marked trend towards upskilling, the authors take issue with the argument that a new type of employment relationship is emerging, arguing instead that the restructuring of the employment relationship has, in fact, reinforced traditional lines of division in the workforce.

Desert Views & Flower Hues

Yvonne Weaver
2014-07-18 Yvonne Weaver created this coloring book to provide hours of enjoyment. Yvonne has chosen to make each page something children of all ages can color and enjoy with their family and friends. She has included desert scenes as well as reptiles and migratory birds who visit the wetland areas. The flowers are just for fun; she loves to color them herself. The desert comes alive in the spring with many beautiful colored wildflowers. The desert scenery changes colors as the sun rises and sets. Yvonne

saw a need for a coloring book to encourage children to love our planet and care for our wildlife. She suggests, "Just have fun with it."
