Power System Analysis and Design-J. Duncan Glover 2011-01-03 The

new edition of POWER SYSTEM ANALYSIS AND DESIGN provides students with an introduction to the basic concepts of power systems along with tools to aid them in applying these skills to real world situations. Physical concepts are highlighted while also giving necessary attention to mathematical techniques. Both theory and modeling are developed from simple beginnings so that they can be readily extended to new and complex situations. The authors incorporate new tools and material to aid students with design issues and reflect recent trends in the field. Adverse Effects of Vaccines-Institute of Medicine 2012-04-26 In 1900, for every 1,000 babies born in the United States, 100 would die before their first birthday, often due to infectious diseases. Today, vaccines exist for many viral and bacterial diseases. The National Childhood Vaccine Injury Act, passed in 1986, was intended to bolster vaccine research and development through the federal coordination of vaccine initiatives and to provide relief to vaccine manufacturers facing financial burdens. The legislation also intended to address concerns about the safety of vaccines by instituting a compensation program, setting up a passive surveillance system for vaccine adverse events, and by providing information to consumers. A key component of the legislation required the U.S. Department of Health and Human Services to collaborate with the Institute of Medicine to assess concerns about the safety of vaccines and potential adverse events, especially in children. Adverse Effects of Vaccines reviews

the epidemiological, clinical, and biological evidence regarding adverse health events associated with specific vaccines covered by the National Vaccine Injury Compensation Program (VICP), including the varicella zoster vaccine, influenza vaccines, the hepatitis B vaccine, and the human papillomavirus vaccine, among others. For each possible adverse event, the report reviews peer-reviewed primary studies, summarizes their findings, and evaluates the epidemiological, clinical, and biological evidence. It finds that while no vaccine is 100 percent safe, very few adverse events are shown to be caused by vaccines. In addition, the evidence shows that vaccines do not cause several conditions. For example, the MMR vaccine is not associated with autism or childhood diabetes. Also, the DTaP vaccine is not associated with diabetes and the influenza vaccine given as a shot does not exacerbate asthma. Adverse Effects of Vaccines will be of special interest to the National Vaccine Program Office, the VICP, the Centers for Disease Control and Prevention, vaccine safety researchers and manufacturers, parents, caregivers, and health professionals in the private and public sectors.

Towards a sustainable, participatory and inclusive wild meat sector-

Coad, L. 2019-01-30 The meat of wild species, referred to in this report as 'wild meat', is an essential source of protein and a generator of income for millions of forest-living communities in tropical and subtropical regions. However, unsustainable harvest rates currently

Viruses in Foods-Sagar Goyal 2007-01-15 This is the first book to focus entirely on viruses in foods. It collates information on the occurrence, detection, transmission, and epidemiology of viruses in various foods. Although methods for bacterial detection in food are available, methods for detection of viruses in food, with the exception of shellfish, are not available. It is important, therefore, to develop methods for direct examination of food for viruses and to explore alternate indicators that can accurately reflect the virological quality of food. This book addresses these issues along with strategies for the prevention and control of viral contamination of food.

Immunoproteomics-Kelly M. Fulton 2020-08-14 This second edition volume expands on the previous edition with new sections describing the characterization of peptides bound to major histocompatibility complexes (MHC) on the surface of the cell. Chapters also cover topics such as using SERPA for antigen identification; antigen content of electroimmunoprecipitates; whole genome-phage display libraries; antigens in immune complexes; and immunoproteomic biomarkers. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and thorough, Immunoproteomics: Methods and Protocols, Second Edition is a valuable resource that presents novice and expert researchers with techniques that are easily transferrable to laboratories and provides enhanced hands-on insights into this evolving field.

Japanese Rinzai Zen Buddhism-Jørn Borup 2008-02-25 Japanese Rinzai Zen Buddhism gives a new perspective on contemporary Japanese Zen Buddhism. Ideas, ritual practices, temples and interactions between the clergy, the laity and the institution are investigated as living representations of a unique and yet common Japanese religion.

Drones for Biodiversity Conservation and Ecological Monitoring-Ricardo Díaz-Delgado 2019-12-18 Unmanned aerial vehicles (UAV) have already become an affordable and cost-efficient tool to quickly map a targeted area for many emerging applications in the arena of ecological monitoring and biodiversity conservation. Managers, owners, companies, and scientists are using professional drones equipped with high-resolution

visible, multispectral, or thermal cameras to assess the state of ecosystems, the effect of disturbances, or the dynamics and changes within biological communities inter alia. We are now at a tipping point on the use of drones for these type of applications over natural areas. UAV missions are increasing but most of them are testing applicability. It is time now to move to frequent revisiting missions, aiding in the retrieval of important biophysical parameters in ecosystems or mapping species distributions. This Special Issue shows UAV applications contributing to a better understanding of biodiversity and ecosystem status, threats, changes, and trends. It documents the enhancement of knowledge in ecological integrity parameters mapping, long-term ecological monitoring based on drones, mapping of alien species spread and distribution, upscaling ecological variables from drone to satellite images: methods and approaches, rapid risk and disturbance assessment using drones, mapping albedo with UAVs, wildlife tracking, bird colony and chimpanzee nest mapping, habitat mapping and monitoring, and a review on drones for conservation in protected areas.

Human Cytomegalovirus-Thomas E. Shenk 2008-05-09 This volume has gathered some of the experts in the field to review aspects of our understanding of CMV and to offer perspectives of the current problems associated with CMV. The editors and authors hope that the chapters will lead to a better understanding of the virus that will assist in the development of new and unique antivirals, a protective vaccine, and a full understanding of CMV's involvement in human disease.

Central Nervous System Tumours-Thomas J. Deeley 1974

Ultimate Lost and Philosophy-Sharon Kaye 2010-10-12 Expanded and up-to-date-the ultimate guide that explores meaning and philosophy of all six seasons of Lost Lost is more than just a popular television show; it's a complex examination of meaningful philosophical questions. What does good versus evil mean on the island? Is it a coincidence that characters John Locke and Desmond David Hume are named after actual philosophers? What is the ethics of responsibility for Jack? An action-adventure story with more than a touch of the metaphysical, Lost forces viewers to ask difficult questions of themselves just as the story asks difficult questions of its characters. Ultimate Lost and Philosophy helps you explore the deeper meaning and philosophical questions hidden within every complex twist and turn in the historic show's entire six-season run. Includes every season of Lost, including 2010's final, highly anticipated season Connects events on the show to core philosophical issues such as truth, identity, and morality Explores a host of intriguing topics such as time travel, freedom, love, and loss For fans of Lost who are interested in what the show reveals about ourselves and the human condition, Ultimate Lost and Philosophy is an entertaining, informative, and enlightening resource.

Historical Wig Styling: Ancient Egypt to the 1830s-Allison Lowery 2019-11-28 Historical Wig Styling: Ancient Egypt to the 1830s, 2nd edition, is a guide to creating beautiful, historically accurate hairstyles for theatrical productions and events. This volume covers hairstyles from Ancient Egypt through Romantic/Biedermeier styles of the 1820s and 30s. Chapters begin with an overview of historic figures who influenced the look of each period and their styles, followed by step-by-step instructions and photographs showing the finished look from every angle. The book also explores the necessary supplies and styling products needed to create the perfect coif, tips for proper wig handling, a brief history of the makeup for each historical period, and basic styling techniques useful when working with wigs or real hair. New hairstyles featured in this edition include: - Ancient Egyptian male dreadlocks - Ancient Grecian male curls - Ancient Roman braided goddess - Braided Medieval lady - Regency hairstyle with a Classical influence With over 1,000 full-color images and detailed instructions on how to create iconic hairstyles and makeup, Historical Wig Styling: Ancient Egypt to the 1830s, 2nd edition, is an excellent resource for professional costume designers and wig makers, as well as for students of

Caries Excavation: Evolution of Treating Cavitated Carious Lesions-F.

Schwendicke 2018-09-13 Currently there is no reason, in most cases of cavitated caries lesions, to remove affected tissue. This book presents evidence-based research on the topic and provides assessments of diagnostic devices. It offers new insights into how a dentine carious cavity can be managed by either tissue removal or restoration. Methods for preserving dental tissue are presented and ample evidence highlights the need to seal with a quality restorative material. An update on how to conduct a randomized clinical trial is followed by a chapter on agreed upon terminology for supporting improved communication among oral health professionals around the world. This is a must-read for general practitioners, restorative specialists, dental students, and oral hygienists/therapists.

Sterile Insect Technique-V.A. Dyck 2006-02-23 The sterile insect technique (SIT) is an environment-friendly pest control method that fits into area-wide integrated pest management (AW-IPM) programmes. This book describes the principles and practice of SIT, frankly evaluating its strengths and weaknesses, successes and failures. SIT is useful against pests that have considerable impact on plant, animal and human health, and criteria are provided to guide in the selection of pests appropriate for SIT.

Food-borne Viruses-M. P. G. Koopmans 2008 Food-borne viruses are recognized as a major health concern, but their distribution, definition, and impact are poorly understood. The volume Food-Borne Viruses goes a long way in correcting that problem. Written by leading scientists in the field, it brings together the latest knowledge on these viral strains, their detection and control, and associated challenges.

Artistic Research- 2016-08-09 Currently, advanced art education is in the process of developing (doctorate or PhD) research programs throughout Europe. Therefore, it seems to us urgent to explore what the term research actually means in the topical practice of art. After all, research as such is often understood as a method stemming from the alpha, beta or gamma sciences directed towards knowledge production and the development of a certain scientific domain. How is artistic research connected with those types of scientific research, taking into account that the artistic domain so far has tended to continually exceed the parameters of knowledge management? One could claim that the artistic field comprises the hermeneutic question of the humanities, the experimental method of the sciences, and the societal commitment of the social sciences. Will that knowledge influence the domain, the methodology, and the outcome of artistic research? Another major topic concerns not only the specificity of the object of knowledge of artistic research but above all whether and how artistic research and its institutional programs will influence topical visual art, its artworks and its exhibitions. These complex problematics with their various points of view and management models are mapped out through the contributions of theorists, curators, and institutions, from Belgium, France, Great-Britain, Italy, The Netherlands, Finland, Germany, and Sweden. May these contributions be a constructive impetus for a versatile debate which may influence the future role of advanced art institutions and the position of artistic research in the next decade.

Handbook of Poultry Science and Technology, Primary Processing-

Isabel Guerrero-Legarreta 2010-03-30 A comprehensive reference for the poultry industry—Volume 1 describes everything from husbandry up to preservation With an unparalleled level of coverage, the Handbook of Poultry Science and Technology provides an up-to-date and comprehensive reference on poultry processing. Volume 1 describes husbandry, slaughter, preservation, and safety. It presents all the details professionals need to know beginning with live poultry through to the freezing of whole poultry and predetermined cut parts. Throughout, the coverage focuses on one paramount objective: an acceptable quality and a safe product for consumer

purchase and use. The text includes safety requirements and regulatory enforcement in the United States, EU, and Asia. Volume 1: Primary Processing is divided into seven parts: Poultry: biology to pre-mortem status—includes such topics as classification and biology, competitive exclusion, transportation to the slaughterhouse, and more Slaughtering and cutting—includes the slaughterhouse building and required facilities, equipment, and operations; carcass evaluation and cutting; kosher and halal slaughter; and more Preservation: refrigeration and freezing—includes the biology and physicochemistry of poultry meat in rigor mortis under ambient temperature, as well as changes that occur during freezing and thawing; engineering principles; equipment and processes; quality; refrigeration and freezing for various facilities; and more Preservation: heating, drying, chemicals, and irradiation Composition, chemistry, and sensory attributes—includes quality characteristics, microbiology, nutritional components, chemical composition, and texture of raw poultry meat Eggs—includes egg attributes, science, and technology Sanitation and Safety—includes PSE, poultry-related foodborne diseases, OSHA requirements, HACCP and its application, and more

Low-dose antibiotics: current status and outlook for the future-

Robert Paul Hunter 2014-12-01 Antimicrobial therapy is a key factor in our success against pathogens poised to ravage at risk or infected individuals. However, we are currently at a watershed point as we face a growing crisis of antibiotic resistance among diverse pathogens. One area of intense interest is the impact of the application of antibiotics for uses other than the treatment of patients and the association with such utilization with emerging drug resistance. This Research Topic “Low- dose antibiotics: current status and outlook for the future” in *Frontiers in Microbiology: Antimicrobials, Resistance and Chemotherapy* details various aspects of the wide ranging effects of antimicrobial therapy from areas such as the regulation of host responses to modulation of bacterial virulence factors to acquisition of antibiotic resistance genes.

The Wicked Problem of Forest Policy-

William Nikolakis 2020-07-31 Provides a global analysis of policies to address deforestation, an important driver of climate change.

Infection Control in the Dental Office-Louis G. DePaola 2019-11-17 This book reviews the principles of infection control and the guidelines and standards of care in multiple countries, discussing them within the context of the practice of dentistry. The aim is to enable dental practitioners to ensure that the appropriate measures are adopted for each patient contact, thereby minimizing the risk of transmission of infection - a goal that is becoming ever more important given the threats posed by new or re-emerging infectious diseases and drug-resistant infections. Readers will find information and guidance on all aspects of infection control within the dental office: hand and respiratory hygiene, use of personal protective equipment, safe handling of sharps and safe injection practices, management of occupational exposures, maintenance of dental unit water quality, surface disinfection, and the cleaning and sterilization of dental instruments. *Infection Control in the Dental Office* will be an invaluable asset for all dental practitioners, including dentists, dental specialists, dental hygienists, and dental assistants.

Who's who in Science and Engineering- 2008

Agrobiodiversity Conservation-Nigel Maxted 2012 Based on the 2010 conference "Towards the establishment of genetic reserves for crop wild relatives and landraces in Europe", this book is the cutting edge discussion of agrobiodiversity conservation. By considering the benefits of understanding and preserving crop wild relatives and landraces, it encompasses issues as wide-ranging and topical as habitat protection, ecosystem health and food security. Focusing on Europe, but globally relevant, *Agrobiodiversity Conservation* is ideal for postgraduate students of conservation and environmental studies, conservation professionals, policy makers and researchers.

Books in Print Supplement- 1978

Bergey's Manual of Systematic Bacteriology-David R. Boone 2012-01-13 Bacteriologists from all levels of expertise and within all specialties rely on this Manual as one of the most comprehensive and authoritative works. Since publication of the first edition of the Systematics, the field has undergone revolutionary changes, leading to a phylogenetic classification of prokaryotes based on sequencing of the small ribosomal subunit. The list of validly named species has more than doubled since publication of the first edition, and descriptions of over 2000 new and realigned species are included in this new edition along with more in-depth ecological information about individual taxa and extensive introductory essays by leading authorities in the field.

The State of Open Data-Davies, Tim 2019-05-22 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

Protein Function Prediction-Daisuke Kihara 2017-05-20 This volume presents established bioinformatics tools and databases for function prediction of proteins. Reflecting the diversity of this active field in bioinformatics, the chapters in this book discuss a variety of tools and resources such as sequence-, structure-, systems-, and interaction-based function prediction methods, tools for functional analysis of metagenomics

data, detecting moonlighting-proteins, sub-cellular localization prediction, and pathway and comparative genomics databases. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, step-by-step instructions of how to use software and web resources, use cases, and tips on troubleshooting and avoiding known pitfalls. Thorough and cutting-edge, Protein Function Prediction: Methods and Protocols is a valuable and practical guide for using bioinformatics tools for investigating protein function

Allergy- 2003

Recent Progress in Slow Sand and Alternative Biofiltration Processes-Rolf Gimbel 2006-03-31 Slow sand filtration is typically cited as being the first "engineered" process in drinking-water treatment. Proven modifications to the conventional slow sand filtration process, the awareness of induced biological activity in riverbank filtration systems, and the growth of oxidant-induced biological removals in more rapid-rate filters (e.g. biological activated carbon) demonstrate the renaissance of biofiltration as a treatment process that remains viable for both small, rural communities and major cities. Biofiltration is expected to become even more common in the future as efforts intensify to decrease the presence of disease-causing microorganisms and disinfection by-products in drinking water, to minimize microbial regrowth potential in distribution systems, and where operator skill levels are emphasized. Recent Progress in Slow Sand and Alternative Biofiltration Processes provides a state-of-the-art assessment on a variety of biofiltration systems from studies conducted around the world. The authors collectively represent a perspective from 23 countries and include academics, biofiltration system users, designers, and manufacturers. It provides an up-to-date perspective on the physical, chemical, biological, and operational factors affecting the performance of slow sand filtration (SSF), riverbank filtration (RBF), soil-aquifer treatment (SAT), and biological activated carbon (BAC) processes. The main themes are: comparable overviews of biofiltration systems; slow sand filtration process behavior, treatment performance and process developments; and alternative biofiltration process behaviors, treatment performances, and

process developments.

Advances in Molten Slags, Fluxes, and Salts-Ramana Reddy 2017-01-10

This collection focuses on ferrous and non-ferrous metallurgy where ionic melts, slags, fluxes, or salts play important roles in industrial growth and economy worldwide. Technical topics included are: thermodynamic properties and phase diagrams and kinetics of slags, fluxes, and salts;

physical properties of slags, fluxes, and salts; structural studies of slags; interfacial and process phenomena involving foaming, bubble formation, and drainage; slag recycling, refractory erosion/corrosion, and freeze linings; and recycling and utilization of metallurgical slags and models and their applications in process improvement and optimization. These topics are of interest to not only traditional ferrous and non-ferrous metal industrial processes but also new and upcoming technologies.
