

Mirrors of the Soul-Kahlil Gibran 2011-12-20 A well-rounded look at the personal life, poetry, painting, and philosophy of the famous twentieth-century spiritual guide and author of The Prophet. Kahlil Gibran wrote prolifically and passionately in Arabic as well as English. First published in 1965 with nine works of poetry translated by Joseph Sheban, Mirrors of the Soul includes writings by Gibran that are as poignant today as when first written, such as “The New Frontier” and “The Sea.” These poems illuminate the dual nature of Gibran, who lived in the shadows both of New York skyscrapers and the cedars of his childhood Lebanon. Sheban enriches the new works with an insightful biography, a historical examination of politics and religion in Gibran’s native land, and the inclusion of revolutionary poems such as “My Countrymen” and “My People Died.”

Enemy at the Water Cooler-Brian T Contos 2006-10-30 The book covers a decade of work with some of the largest commercial and government agencies around the world in addressing cyber security related to malicious insiders (trusted employees, contractors, and partners). It explores organized crime, terrorist threats, and hackers. It addresses the steps organizations must take to address insider threats at a people, process, and technology level. Today's headlines are littered with news of identity thieves, organized cyber criminals, corporate espionage, nation-state threats, and terrorists. They represent the next wave of security threats but still possess nowhere near the devastating potential of the most insidious threat: the insider. This is not the bored 16-year-old hacker. We are talking about insiders like you and me, trusted employees with access to information - consultants, contractors, partners, visitors, vendors, and cleaning crews. Anyone in an organization's building or networks that possesses some level of trust. * Full coverage of this hot topic for virtually every global 5000 organization, government agency, and individual interested in security. * Brian Contos is the Chief Security Officer for one of the most well known, profitable and respected security software companies in the U.S.—ArcSight.
