Higher Education Pathways-Ashwin, Paul 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Technological Advances in Surgery, Trauma and Critical Care-Rifat Latifi 2015-09-25 This text is designed to provide a comprehensive and state-of-the-art overview of the major issues specific to technological advances the field trauma, critical care and many aspects of surgical science and practice. Care of these patients and clinical conditions can be quite complex, and materials have been collected from the most current, evidence-based resources. The sections of the text have been structured to review the overall scope of issues dealing with trauma, critical care and surgery, including cardiothoracic surgery, vascular surgery, urology, gynecology and obstetrics, fetal surgery and orthopedics. This volume represents the most comprehensive textbook covering a wide range of topics and technological advances including genomics and nanotechnologies that affect patients' care and surgeons' practice daily. The multidisciplinary authorship includes experts from all aspects of trauma, surgery and critical care. The volume highlights the dramatic changes in the field including hand held devices and smart phones used in daily medical and surgical practice, complex computers in the critical care units around the world, and robotics performing complex surgical procedures and tissue engineering. Technological Advances in Surgery, Trauma and Critical Care provides a comprehensive, state-of-the art review of this field, and will serve as a valuable resource for clinicians, surgeons and researchers with an interest in trauma, critical care, and all the specialties of surgery. It provides a concise yet comprehensive summary of the current status of the field that will help guide patient management and stimulate investigative efforts.

Nutrition and Health in a Developing World-Saskia de Pee 2017-02-13 This third edition reviews the epidemiology, policies, programs and outcome indicators that are used to determine improvements in nutrition and health that lead to development. This greatly expanded third edition provides policy makers, nutritionists, students, scientists, and professionals with the most recent and up-to-date knowledge regarding major health and nutritional problems in developing countries. Policies and programs that address the social and economic determinants of nutrition and health are now gaining in importance as methods to improve the status of the most vulnerable people in the world. This volume provides the most current research and strategies so that policy makers, program managers, researchers and students have knowledge and resources that they can use to advance methods for improving the public's health and the development of nations. The third edition of Nutrition and Health in Developing Countries takes on a new context where the word “developing” is now a verb and not an adjective.

Clinical Application of Mechanical Ventilation-David W. Chang 2013-02-13 CLINICAL APPLICATION OF MECHANICAL VENTILATION, FOURTH EDITION integrates fundamental concepts of respiratory physiology with the day-to-day duties of a respiratory care professional. Utilizing the wide degree of topics covered, including airway management, understanding ventilator waveforms, and addressing critical care issues, students have the best resource available for understanding mechanical ventilation and its clinical application. Enhancing the learning experience are valuable illustrations of concepts and equipment, highlighted key points, and self-assessment questions in NRBC format with answers. Whether preparing for the national exam or double-checking a respiratory care calculation, this textbook provides the fundamental principles of respiratory care with the clinical guidance necessary for mechanical ventilation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

ABC of Rheumatology-Ade Adebajo 2018-06-18 ABC of Rheumatology continues to be a practical and informative guide to the assessment, treatment and management of common rheumatic and musculoskeletal conditions within primary care. Fully updated to reflect developments in this fast growing field, the fifth edition covers overviews of all key areas of rheumatology, and includes new chapters on radiology and immunology, as well as expanded coverage on metabolic bone disease, chronic widespread pain, and complex regional pain syndrome. Featuring highly illustrated chapters, boxed summaries and links to further resources, ABC of Rheumatology is an accessible reference for all primary care health professional, general practitioners, family physicians, junior doctors, medical students and nurses.

Ophthalmic Nursing-Mary E. Shaw 2018-09-03 Ophthalmic Nursing provides an overview for those just setting out in a role within ophthalmic nursing. It includes basic and comprehensible anatomy and physiology - the foundations for understanding how the eye functions and why and how problems occur - and relates them to the care and needs of the patient. This accessible text includes evidence-based procedure guidelines and the inclusion of reflective activities in most chapters allows readers to apply their knowledge to the realities of the care setting. Also covered are the most recent National Institute for Health and Care Excellence (NICE) guidelines for glaucoma and age-related macular degeneration. Since the publication of the fourth edition, there have been many advances in the care and management of the ophthalmic patient. The authors have updated the chapters accordingly and included new colour images and diagrams. References, further reading and websites have also been updated to reflect current trends. A valuable resource for nurses in practice and training, this book continues to be the 'go-to' source for those caring for the ophthalmic patient.

Beneath the Surface-Lynn M. Thomas 2020-01-20 For more than a century, skin lighteners have been a ubiquitous feature of global popular culture—embraced by consumers even as they were fiercely opposed by medical professionals, consumer health advocates, and antiracist thinkers and activists. In Beneath the Surface, Lynn M. Thomas constructs a transnational history of skin lighteners in South Africa and beyond. Analyzing a wide range of archival, popular culture, and oral history sources, Thomas traces the changing meanings of skin color from precolonial times to the postcolonial present. From indigenous skin-brightening practices and the rapid spread of lighteners in South African consumer culture during the 1940s and 1950s to the growth of a billion-dollar global lightener industry, Thomas shows how the use of skin lighteners and experiences of skin color have been shaped by slavery, colonialism, and segregation as well as by consumer capitalism, visual media, notions of beauty, and protest politics. In teasing out lighteners' layered history, Thomas theorizes skin as a site for antiracist struggle and lighteners as a technology of visibility that both challenges and entrenches racial and gender hierarchies.

Antibiotic Pharmacokinetic/Pharmacodynamic Considerations in the Critically Ill-Andrew A. Udy 2017-09-18 This book provides unique insights into the issues

that drive modified dosing regimens for antibiotics in the critically ill. Leading international authors provide their commentary alongside a summary of existing evidence on how to effectively dose antibiotics. Severe infection frequently necessitates admission to the intensive care unit (ICU). Equally, nosocomial sepsis often complicates the clinical course in ICU. Early, appropriate application of antibiotic therapy remains a cornerstone of effective management. However, this is challenging in the critical care environment, given the significant changes in patient physiology and organ function frequently encountered. Being cognisant of these factors, prescribers need to consider modified dosing regimens, not only to ensure adequate drug exposure, and therefore the greatest chance of clinical cure, but also to avoid encouraging drug resistance.

Learning to Care-Ian Peate 2019-02-28 Edited by a world-renowned authority, Learning to Care has been prepared by a team of experienced nurse educationalists and practitioners to meet the learning needs of the new Nursing Associate. Richly illustrated throughout, this exciting resource is designed to fully equip trainee nursing associates for their future role as professional healthcare providers with chapters ranging from 'how to learn' and essay writing to communication skills, reflective practice, and the role of evidence-based clinical decision making. Complete with a full exploration of basic anatomy and physiology, together with the care and treatment of common disorders, Learning to Care also comes with a wide range of helpful learning features such as 'Hot Spots' and the 'Medicine Trolley', all designed to aid learning and help foster safe clinical practice. The volume comes complete with a downloadable image bank to assist with assignments. Learning to Care will be ideal for all Trainee Nursing Associates and Health Care Assistants wishing to enhance their knowledge-base as well as those on Enrolled Nurse programs overseas. Clear, no nonsense writing style helps make learning easy Provides helpful advice on study skills and essay writing Incorporates the 15 Standards of the Care Certificate Learning objectives at the start of each chapter enable readers to monitor their progress Key Words feature encourage familiarisation with a new vocabulary 'Self Test' questions at the start of each chapter allow readers to establish their baseline knowledge Reflection and Critical Awareness features encourage critical thinking and recall of essential information Medicine Trolley feature outlines common drugs, their usage, routes of administration and side effects Case Studies give practical context to core information Care in the Home Setting, At the GP Surgery and Communities of Care boxes illustrate healthcare provision outside the hospital environment Includes anatomy and physiology and pathophysiology of important diseases and disorders OSCEs help trainee nursing associates prepare for examinations Helpful glossary provides definitions of new terms

Occupational Therapy in Neonatal Services and Early Intervention- 2017-08

Seminars in Dysphagia-Renee Speyer 2015-09-02 Seminars in Dysphagia provides a comprehensive overview of contemporary issues in the field of dysphagia assessment, treatment and management in diverse subject populations. Expert views are shared by international clinical experts from different medical and allied health fields. This book contains an introductory chapter on the anatomical structures and physiology processes that underpin dysphagia and discusses the effects of polypharmacy and ageing on deglutition. Contemporary practices of functional assessment of swallowing and the endoscopic assessment for both oropharyngeal and esophageal dysphagia are reviewed. Both the nutritional support and decision making in oral route are described and the impact of dysphagia on carers and family when managing dysphagia. Several chapters are dedicated to outlining the manifestation and consequences of dysphagia in specific populations, including persons with Parkinsons disease, dystonia, chronic obstructive pulmonary disease and mixed connective tissue disease.

Canadian Consensus Guidelines for the Treatment of Seasonal Affective Disorder-Anthony J. Levitt 1999

Para-States and Medical Science-Paul Wenzel Geissler 2015-01-19 In Para-States and Medical Science, P. Wenzel Geissler and the contributors examine how medicine and public health in Africa have been transformed as a result of economic and political liberalization and globalization, intertwined with epidemiological and technological changes. The resulting fragmented medical science landscape is shaped and sustained by transnational flows of expertise and resources. NGOs, universities, pharmaceutical companies and other nonstate actors now play a significant role in medical research and treatment. But as the contributors to this volume argue, these groups have not supplanted the primacy of the nation-state in Africa. Although not necessarily stable or responsive, national governments remain crucial in medical care, both as employers of health care professionals and as sources of regulation, access, and - albeit sometimes counterintuitively - trust for their people. “The state” has morphed into the “para-state” — not a monolithic and predictable source of sovereignty and governance, but a shifting, and at times ephemeral, figure. Tracing the emergence of the “global health” paradigm in Africa in the treatment of HIV, malaria, and leprosy, this book challenges familiar notions of African statehood as weak or illegitimate by elaborating complex new frameworks of governmentality that can be simultaneously functioning and dysfunctional. Contributors. Uli Beisel, Didier Fassin, P. Wenzel Geissler, Rene Gerrets, Ann Kelly, Guillaume Lachenal, John Manton, Lotte Meinert, Vinh-Kim Nguyen, Branwyn Poleykett, Susan Reynolds Whyte

Schein’s Common Sense Emergency Abdominal Surgery-Moshe Schein 2012-12-06 ix Preface Smart surgeons learn from their own mistakes, smarter surgeons learn from mistakes of others, some never learn . . . You are a resident, overworked and constantly tired; sitting down with your mentor for a brief tutorial. What do you want to get out of these few minutes? To organize your thoughts and approaches to the particular problem; to learn how he -the weathered surgeon -"tackles it"; to grasp a few practical "recipes" or "goodies" and take home a message or two; to laugh a bit and unwind. This is also our goal in this book. We hope that you are not repelled or offended by the non-formal character of this book. This is how emergency abdominal surgery is taught best, by trial and error and repetitions, with emphasis on basics. This is not a "complete" textbook, nor is it a cookbook type manual or discussion of case studies; neither is it a collection of detailed lecture notes or exhaustive lists. Instead, it consists of a series of informal, uncensored, chats between experienced surgeons and their trainees. No percentages, series, elaborated figures or complicated algorithms are included; only a surgeon's narrative, explaining how "he does it" -based on his experience and state of the art knowledge of the literature. No references are included as it was our aim to put down nothing which has not been experienced, confirmed and practiced in our own hands.

Handbook of Applied Developmental Science in Sub-Saharan Africa-Amina Abubakar 2017-11-17 This handbook collates research evidence and presents the most up-to-date findings on child development in Sub-Saharan Africa. It discusses complex risk factors and medical conditions affecting childhood outcomes, and spotlights emerging programs for enhancing literacy and cognitive development. The panel of expert contributors offer needed context and knowledge to the discussion of previously understudied topics. Chapters present proven intervention strategies currently in use across the diverse region. In addition, this handbook provides guidelines for culturally sensitive and ethical research that will inform practice and help shape policy goals and initiatives. Topics featured in the Handbook include: · Fatherhood in the African context. · Sibling care-giving and its implications in Sub-Saharan Africa. · Nutritional status, infections, and child development · Diabetes in

Sub-Saharan African children. · How to adapt tests for Sub-Saharan Africa. · Interventions aimed at children and caregivers. · A culturally sensitive approach to conducting research and promoting initial literacy development in Africa The Handbook of Applied Developmental Science in Sub-Saharan Africa is a must-have resource for researchers, professionals/scientist-practitioners, and graduate students in child, school, and developmental psychology, as well as pediatrics, social work, public health, and education.

An Introduction to Clinical Governance and Patient Safety-Elizabeth Haxby 2010-09-16 Clinical Governance is integral to healthcare and all doctors must have an understanding of both basic principles, and how to apply them in daily practice. Within the Clinical Governance framework, patient safety is the top priority for all healthcare organisations, with the prevention of avoidable harm a key goal. Traditionally medical training has concentrated on the acquisition of knowledge and skills related to diagnostic intervention and therapeutic procedures. The need to focus on non-technical aspects of clinical practice, including communication and team working, is now evident; ensuring tomorrow's staff are competent to function effectively in any healthcare facility. This book provides a guide to how healthcare systems work; their structure, regulation and inspection, and key areas including risk management, resource effectiveness and wider aspects of knowledge management. Changing curricula at undergraduate level reflect this, but post-graduate training is lagging behind and does not always equip trainees appropriately for a hectic clinical environment. An Introduction to Clinical Governance and Patient Safety presents a simple overview of clinical governance in context, highlighting important principles required to function effectively in a pressurised healthcare environment. It is presented in short sections based on the original seven pillars of clinical governance. These have been expanded to include the fundamental principles of systems, team working, leadership, accountability, and ownership in healthcare, with examples from everyday practice. This format is designed to facilitate use as a 'pocket guide' which can be dipped into during the working day, as well as for general reading. Examples from all branches of medicine are presented to facilitate understanding. Contributors are taken from a broad base - from junior doctors to internationally recognised experts - ensuring issues are addressed from all perspectives.

The Psychoses of Menstruation and Childbearing-Ian Brockington 2017-08-31 This book reviews the range of psychoses that complicate the reproductive process, describing a range of interventions and preventive strategies.

Quantum Physics-John S. Townsend 2010 This brilliantly innovative textbook is intended as a first introduction to quantum mechanics and its applications. Townsend's new text shuns the historical ordering that characterizes so-called Modern Physics textbooks and applies a truly modern approach to this subject, starting instead with contemporary single-photon and single-atom interference experiments. The text progresses naturally from a thorough introduction to wave mechanics through applications of quantum mechanics to solid-state, nuclear, and particle physics, thereby including most of the topics normally presented in a Modern Physics course. Examples of topics include blackbody radiation, Bose-Einstein condensation, the band-structure of solids and the silicon revolution, the curve of binding energy and nuclear fission and fusion, and the Standard Model of particle physics. Students can see in quantum mechanics a common thread that ties these topics into a coherent picture of how the world works, a picture that gives students confidence that quantum mechanics really works, too. The book also includes a chapter-length appendix on special relativity for the benefit of students who have not had a previous exposure to this subject.

The Clinical Nurse Specialist-Debra Humphris 1994-11-11 The Clinical Nurse Specialist (C.N.S.) works across a huge range of practice areas. Despite this, certain common issues arise, and it is these issues which are addressed in this book. Each contributor examines a different facet of the C.N.S. role, be it practitioner, educator, researcher or consultant. Discussion is linked to practice through the use of examples based on the writer's own experience. This is the first British text to deal with questions of common interest to the C.N.S. The intention is to raise the debate to the nature of the role and acknowledge the vital contribution Clinical Nurse Specialists have to make to the continuing development of the quality of individual nursing care.

The Hotel Riviera-Elizabeth Adler 2010-04-01 American Lola Laforet was swept away in a whirlwind wedding and found herself the chef/owner of the Hotel Riviera. Her life seemed to be a dream come true. But then her husband disappeared one day with nothing more than a wave goodbye. Six months later, Jack Ferrar, an American ex-pat living on his boat, drops anchor in Lola's harbor and teaches her the true meaning of attraction. When various shady people-all claiming ownership of the Hotel Riviera-and the police appear, Lola and Jack have to track down the mysterious Patrick. And along the way, they fall in love. With great food, wonderful sensuality, and lush scenery, Elizabeth Adler holds you under her spell and transports you to one of the most romantic places on earth.

Entertainment-Education and Social Change-Arvind Singhal 2003-12-08 Entertainment-Education and Social Change introduces readers to entertainment-education (E-E) literature from multiple perspectives. This distinctive collection covers the history of entertainment-education, its applications in the United States and throughout the world, the multiple communication theories that bear on E-E, and a range of research methods for studying the effects of E-E interventions. The editors include commentary and insights from prominent E-E theoreticians, practitioners, activists, and researchers, representing a wide range of nationalities and theoretical orientations. Examples of effective E-E designs and applications, as well as an agenda for future E-E initiatives and campaigns, make this work a useful volume for scholars, educators, and practitioners in entertainment media studies, behavior change communications, public health, psychology, social work, and other arenas concerned with strategies for social change. It will be an invaluable resource book for members of governmental and non-profit agencies, public health and development professionals, and social activists.

Western Diseases-Norman J. Temple 2012-12-06 Sir Richard Doll, FRS, FRCP ICRF Cancer Research Studies Unit Radcliffe Infirmary, Oxford, UK The twentieth century has seen few changes more remarkable than the improvement in health that has occurred nearly everywhere, most spectacularly in the economically developed countries. In these countries improved nutrition, better housing, the control ofinfection, smaller family sizes, and higher standards of education have brought about a situation in which more than 97% of all liveborn children can expect to survive the first half ofthe three score years and ten that formerly was regarded as the allotted

span oflife. From then on, however, the position is less satisfactory. Some improvement has occurred; but the proportion of survivors who die prematurely, that is under 70 years of age, varies from 25% to over 50% in men and from 13% to 28% in women, the extremes in both sexes being recorded, respectively, in Japan and Hungary. Most of these deaths under 70 years of age must now be called premature, even in Japan. For most of them are not the result of any inevitable aging process, but instead are the consequences of diseases (or types of trauma) that have lower-often much lower-age-specific incidence rates in many of the least developed countries.

Draft Climate Change Bill-Great Britain. Dept. for Environment, Food and Rural Affairs 2007 This document contains a consultation document, the text of the draft Climate Change Bill, explanatory notes to the Bill, and a regulatory impact assessment, published for pre-legislative scrutiny and public consultation. The Bill will introduce a long-term framework for the UK to achieve its goals of reducing carbon dioxide emissions and adapting to the impacts of climate change. The consultation document discusses the context and rationale behind the Climate Change Bill and sets out the main reasons why legislation in this area is required. The key elements of the Bill are: (1) setting targets in statute and carbon budgeting, with a statutory goal of a 60 per cent reduction in carbon dioxide emissions through domestic and international action by 2050, based on a new system of "carbon budgets" set at least fifteen years ahead (with reviews at five yearly intervals), and with progress reported annually to Parliament; (2) establishing an independent Committee on Climate Change to advise the government on how to reduce carbon emissions over time and across the economy; (3) creating enabling powers to allow the introduction of new domestic emissions trading schemes through secondary legislation; (4) reporting requirements will enhance the overall transparency and accountability of UK action on climate change, with the Committee on Climate Change reporting annually to Parliament on progress towards budgets and targets, with the Government required to produce a response to this independent report. The consultation closes on 12 June 2007, and responses are invited using the electronic form that is available at http://www.defra.gov.uk/corporate/consult/climatechange-bill/ although any electronic / written format will be accepted. Responses should be sent to: E-mail: climatechangeconsultation@defra.gsi.gov.uk or by post to: Patrick Erwin / James Hardy, Climate Change Legislation Team, Area 4/F5, Ashdown House, 123 Victoria Street, London SW1E 6DE.

Epidemics and the Health of African Nations-MISTRA 2019-07-25 News footage of disease in Africa is a familiar sight. Yet these outbreaks are often presented out of context, with no reference to the conditions that have triggered them. MISTRA's new book, Epidemics and the Health of African Nations, aims to redress that. Researchers and practitioners from within the continent explore why Africa is so vulnerable to disease, and show how this vulnerability is closely linked to political and economic factors. They demonstrate how these same factors determine the way epidemics are treated. Authors extract lessons from case studies in different parts of Africa; challenge conventional frameworks about disease to argue for a ‘syndemics’ approach that takes into account the interrelationship between disease and political and socio-economic contexts; explore challenges of Africa’s future. They argue that a well-functioning health system is at the core of a country’s capacity to counter an epidemic. This volume brings African experts together to probe possible solutions to the continent’s heavy burden of disease. The insights offered will be helpful in devising policy for the control of disease and the combatting of epidemics in Africa.

Leviathan, Parts I and II-Thomas Hobbes 2005-04-14 This Broadview edition of Hobbes's classic work of political philosophy includes the full text of Part I (Of Man), Part II (Of Commonwealth), and the Review and Conclusion. The appendices, which set the work in its historical context, include a rich selection of contemporary responses to Leviathan. Also included are an introduction, explanatory notes, and a chronology of Hobbes's life. Please note that the Broadview Edition of the complete Leviathan also remains available

A Survey of Race Relations in South Africa- 1993

The Airway-Robert H. Dailey 1992 Both a reference text and a practical manual for use within the clinical setting, this book bases all airway management procedures on current standards of practice. It covers management procedures for the first 30-60 minutes of airway closure, and the pre-hospital management of airway emergencies.

Robot-Assisted Radical Prostatectomy-John W. Davis 2016-09-07 This book addresses knowledge gaps in RARP in 3 key sections: 1) Step-by-step approach including multiple technique options and innovations, 2) Patient selection, safety, outcomes, and 3) Preparing the patient for surgery. The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first. Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place—medical evaluations, imaging, clinical trials, patient education, etc. This textbook emphasizes content for the advanced skills surgeon in that multiple techniques are presented as well as state of the art evidence. The learning curve is addressed and the authors clarify how this text is useful for learners. The caveat is that they should be careful in patient selection and stick with what their mentors are showing them. With experience, they can then branch out into the many techniques presented here. Robot-Assisted Radical Prostatectomy: Beyond the Learning Curve will also have cross-over appeal for surgical assistants, physician assistants, nurses, and anyone else involved in the surgical care of prostate cancer.

Essentials of Human Disease-Leonard Crowley 2012-09-14 Essentials of Human Disease, Second Edition is a consolidated and modified version of the very successful Introduction to Human Disease, now in its Ninth Edition. This book is designed for students who have limited time to master basic disease concepts. It covers the essential structural and functional characteristics of common and important diseases, as well as the principles of diagnosis and treatment. The book is organized into two main sections. The first section deals with general concepts and with diseases affecting the body as a whole. The second section considers the various organ systems and their diseases. Each chapter begins with learning objectives, followed by a brief review of the anatomy and physiology of the organ system discussed, then a systematic survey of the pathology, pathophysiology, clinical manifestations, and principles of treatment of the diseases covered.
