Bobcat Fifty Years- Marking the 50th anniversary of an icon of American industry, this book celebrates a half-century of Bobcat with brilliant images of these quintessentially American machines at work, including historical photographs and diagrams, alongside the full story of the only compact machines that have ever mattered. Often imitated but never equaled, the Bobcat skid-steer loader was born when some hardy souls in the Northern Plains needed a new way to get work done. The pictures in these pages show how the Bobcat loader has been moving American industry ever since, joined over the years by Bobcat excavators and trenchers, utility trucks and more. Bobcat Fifty Years chronicles the changes and innovations that have kept the company at the forefront of the nation's compact machinery makers--from the invention of the Bob-Tach quick-change attachment system to the introduction of the Big Bob, the Mini-Bob, and the M-700, the first hydrostatic loader of its size. Here, again and again, is evidence of why Fortune Magazine named the Bobcat one of "America's best"--one of the 100 American-made products that represent the best of their kind, anywhere in the world.

"I Am Not Master of Events"-Larry Neal 2012-01-24 Two of the greatest financial fiascos of all time took place at the same time and were instigated by two acquaintances: the Mississippi Bubble, on which John Law at first made a vast fortune and gained sway over French finances; and the South Sea Bubble, launched by Law and Thomas Pitt, Jr., Lord Londonderry, his main partner in England. This book tells the story of these two financial schemes from the letters and accounts of two leading personalities. Larry Neal, a distinguished economic historian, highlights the rationality of each person and also finds that the primitive exchanges of the day, though informal and completely unregulated, actually performed reasonably well.

Hydraulic Modelling: An Introduction-Pavel Novak 2018-10-24 Modelling forms a vital part of all engineering design, yet many hydraulic engineers are not fully aware of the assumptions they make. These assumptions can have important consequences when choosing the best model to inform design decisions. Considering the advantages and limitations of both physical and mathematical methods, this book will help you identify the most appropriate form of analysis for the hydraulic engineering application in question. All models require the knowledge of their background, good data and careful interpretation and so this book also provides guidance on the range of accuracy to be expected of the model simulations and how they should be related to the prototype. Applications to models include: open channel systems closed conduit flows storm drainage

systems estuaries coastal and nearshore structures hydraulic structures. This an invaluable guide for students and professionals.

The Tractor in the Haystack-Scott Garvey For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

In His Presence-Elisabeth Seiter; Alma Lauben 2013-01-31 This book is only possible through the will of God. The inspirational messages given to us at times are very evident in this story and are meant for all. God can and will work through anyone whose heart is open and whose mind is still enough to hear that gentle voice speak to them. It is then that we realize how much our heavenly Father loves each one of us and wants us all to have a close relationship with Him. My name is Elisabeth, and this is my journey with the Lord. I was given this opportunity to share a part of my life with you. Alma, my sister, is truly blessed and has accompanied me through this journey. Some of the pictures and most of the inspirational messages associated with the pictures were given to Alma for us to use in this book. The pictures are all a gift from God. For this we humbly thank Him and our Blessed Mother, for allowing us to be a part of God's plan.

Dealing with-Valérie Knoll 2012 The New York gallery American Fine Arts, Co.--whose name today is largely synonymous with that of its gallerist, Colin de Land (1955-2003)--represents a gallery practice in which a decided deviation from conventional models overlaps with successful activities within the framework of the art market. Today, American Fine Arts, Co. and de Land figure as uncontested projection screens for the desire for independence from or bohemian resistance against the dictate of the market. Particularly in retrospect, a consistent image of the gallery is not discernible. Faced with the obvious risk of romanticization, it appears all the more important to pursue an understanding of how American Fine Arts, Co. functioned as a gallery. This book was published on the occasion of the exhibition "Dealing with--Some Books, Visuals, and Works Related to American Fine Arts, Co." at Halle für Kunst Lüneburg and Kunstraum of Leuphana University of Lüneburg (May 28-July 7, 2011), which was developed by Valérie Knoll, Hannes Loichinger, Julia Moritz, and Magnus Schäfer. Contributors Andrea Fraser, Manfred Hermes, Karl Holmqvist and Tobias Kaspar, Isla Leaver-Yap, Jackie McAllister, James Meyer and Christian Philipp Müller, Magnus Schäfer, Axel John Wieder, Phillip Zach; a conversation between Colin de Land, Josef Strau, and Stephan Dillemath; and an introduction by Hannes Loichinger and Magnus Schäfer

Trans(in)fusion-Ranjan Ghosh 2020-10-08 Trans(in)fusion is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. It questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(in)fusion resets the dialectics between text and theory.

Fundamentals of Robotic Mechanical Systems-Jorge Angeles 2013-03-09 Mechanical engineering, an engineering discipline borne of the needs of the industrial revolution, is once again asked to do its substantial share in the call for industrial renewal. The general call is urgent as we face profound issues of productivity and competitiveness that require engineering solutions, among others. The Mechanical Engineering Series features graduate texts and research monographs intended to address the need for information in contemporary areas of mechanical engineering. The series is conceived as a comprehensive one that covers a broad range of concentrations important to mechanical engineering graduate education and research. We are fortunate to have a distinguished roster of consulting editors on the advisory board, each an expert in one of the areas of concentration. The names of the consulting editors are listed on the next page of this volume. The areas of concentration are: applied mechanics; biomechanics; computational mechanics; dynamic systems and control; energetics; mechanics of materials; processing; thermal science; and tribology.

"Western--er?"-Tramway (Arts center : Glasgow, Scotland) 2005 Western er? is a specially commissioned publication produced as part of the exhibition of the same name at Tramway in December 2005. To mark the fact that 2005 was the 400th anniversary of Cervantes novel 'Don Quixote', Tramway invited art / design collective Lapland to co-curate an exhibition using the novel as a starting point. The publication documents the resulting work and contains commissioned writing from Prof Allan Ingram (University of Northumbria), Prof Jeremy Robbins (University of Edinburgh) and artists Jim Colquhoun and Susannah Thompson.

Reliability, Quality, and Safety for Engineers-B.S. Dhillon 2004-11-15 Due to global competition, safety regulations, and other factors, manufacturers are increasingly pressed to create products that are safe, highly reliable, and of high quality. Engineers and quality assurance professionals need a cross-disciplinary understanding of these topics in order to ensure high standards in the design and manufacturing process.

Cookie!-Jan Verwoert 2014-09-05 If we don't merely reduce art to clever code play in the arenas of representation, how do we speak about what is at stake? In response to this question, Verwoert addresses the forces at the heart of the tragicomedy that making, showing, and critiquing art implicates us in. He honors the basic joys of turning one thing into another, and the miracles of rhythm and rhyme that characterize the residual level of mimetic magic in art. In this key, the unverifiable is practiced daily: bodies are remade, feelings transfigured. As Alina Szapocznikow wrote, the mouth chews and out comes sculpture. Verwoert's 'COOKIE!' renders visible the endless emotional labor of setting the stage (for others), poses the thorny question of whether there could ever be a labor union for con-artists (like us), and gestures toward an ethics of disappointment to battle false expectations and as a way to come to terms with the fact that, no matter how you look at it, criticism hurts.

Gerontological Social Work-Merl C. Hokenstad 1988 In this fascinating book, leading international experts in gerontology and social work examine the conditions of older people in their respective native lands--Australia, Canada, West Germany, Great Britain, Israel, Japan, the Netherlands, and Sweden. In response to the need for world-wide sharing of information and research on one of the most dramatic developments of the twentieth century in the United States and throughout the western world--the aging of the populations--these professionals offer an international dimension and cross-cultural knowledge to social gerontology and gerontological social work. Emphasis is placed on the social service delivery system in each country together with an analysis of social work roles and activities. The informative articles include demographic notes, the socioeconomic characteristics of older people in each country, and the author's forecast of trends, issues, and future directions. These timely reviews of what has worked elsewhere may spark greater creativity among educators and practitioners in social work and gerontology in finding alternative solutions to the many problems professionals face as advocates and service providers for older adults. Social work practitioners and educators examine social services for seniors in eight different industrialized countries. Each chapter--focusing on a different country--features: a review of the social service delivery system, providing information about its historical evolution and current organization a look at home care programs, as well as community based and institutionally based services a review of service availability and accessibility with consideration of how social services are coordinated with health care and other human services special attention is given to social work roles within the social service system, including an examination of direct service and planning/management roles a consideration of the importance and usefulness of social work in service provision for each country a brief analysis of current trends and future directions for gerontological social work and social services for the elderly. The cross-national perspectives will

highlight global trends in the industrial world and illuminate distinctions among countries, based upon a particular historical, political, and cultural context. Gerontological Social Work provides a wider base for understanding and evaluating policies and programs in one's own country. Each analysis suggests new and different ways of solving problems and providing services. Social work professionals worldwide will learn successful methods of enabling the elderly to maintain maximum self-sufficiency and participate actively in society, thus insuring improved quality of life.

The Crisis of Capitalist Democracy-Richard A. Posner 2010-03-31 Judge Posner continues to react to the current economic crisis and reflect upon the impact on our views and reliance on capitalism. Posner helps non-technical readers understand business-cycle and financial economics, and financial and governmental institutions, practices, and transactions, while maintaining a neutrality impossible for persons professionally committed to one theory or another.

Linking Health Care and Social Services-Merl C. Hokenstad 1982-09 Universal health care and social services are fundamental building blocks of the welfare state. Invariably they are discrete organizational systems. The problems of clients, however, often overlap. This international volume examines, country by country, the relationship between the health service and the social services. This volume is a welcome addition to the literature that examines the provision of health and social services from an international perspective...the book is useful at two levels: first, as an introduction to the different health and social service delivery systems; and second, as an exploration of the factors that inhibit the establishment of linkages at the service delivery level. Students, teachers, pla

Clinical Manifestations and Assessment of Respiratory Disease-Terry R. Des Jardins 2010-02 Learn to assess and treat respiratory care disorders! Now in full color, Clinical Manifestations and Assessment of Respiratory Disease, 6th Edition bridges normal physiology and pathophysiology to provide a solid foundation in recognizing and assessing conditions. Authors Terry Des Jardins and George G. Burton describe how to systematically gather clinical data, formulate an assessment, make an objective evaluation, identify the desired outcome, and design a safe and effective treatment plan, while documenting each step along the way. Unique coverage of Therapist-Driven Protocols (TDPs) prepares you to implement industry-approved standards of care. Unique! Clinical scenarios connect to specific diseases so you can better understand the disease and the treatment modalities used. Unique! A focus on assessment and Therapist-Driven Protocols (TDPs) emphasizes industry-approved standards of care, providing you with the knowledge and skills to implement these protocols into patient care. Case studies help in applying information to assessment and treatment. Overview boxes summarize the clinical manifestations caused by the pathophysiologic mechanisms of each disorder. End-of-chapter questions include multiple-choice, short answer, matching, and case studies to test knowledge and understanding, pointing out areas that might require further study. A glossary of key terms with definitions is included in the back of the book. Appendices offer easy access to information such as calculations, symbols, medications, and measurements, plus answers to selected case studies. A unique full-color design enhances content and shows realistic examples of diseases and conditions. Student-friendly

features reinforce learning with chapter outlines, objectives, and key terms. A consistent presentation of disease information shows background, treatment, and assessment for each condition so you learn the material in a clear, cohesive manner. Over 15 additional case studies with answers are added to the companion Evolve website.

Cybermohalla Hub-Nikolaus Hirsch 2012 The Cybermohalla project takes on the meaning of the Hindi word mohalla (neighborhood) in its sense of alleys and corners, relatedness and concreteness, as a means for talking about one's "place" in the city. Initiated by the Delhi-based research institute Sarai/CSDS and Ankur, Nikolaus Hirsch and Michel Müller developed a project that involves approximately seventy young practitioners, the Cybermohalla Ensemble, who engage with their urban contexts through various media. Cybermohalla Hub, a hybrid of studio, school, archive, community center, library, and gallery is a structure that moves between Delhi and diverse art contexts including Manifesta 7 and, most recently, the Louisiana Museum of Modern Art in Denmark. The Cybermohalla experiment has been engaged in rethinking urban life, and reimagining and reanimating the infrastructure of cultural and intellectual life in contemporary cities. The book not only documents the architecture of the project, which functions as an attempt to "build knowledge," but also publishes insights that have emerged from the project as a whole. Contributors Can Altay, Cybermohalla Ensemble, Rana Dasgupta, Hu Fang, Naeem Mohaiemen, Hans Ulrich Obrist, Jacques Rancière, Raqs Media Collective, Superflex, et al.
