**Ten Years to Midnight**-Blair H. Sheppard 2020-08-04 “Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act.” —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

**Nonviolence and Peace Psychology**-Daniel Mayton 2009-05-28 Recent trends and events worldwide have increased public interest in nonviolence, pacifism, and peace psychology as well as professional interest across the social sciences. Nonviolence and Peace Psychology assembles multiple perspectives to create a more comprehensive and nuanced understanding of the concepts and phenomena of nonviolence than is usually seen on the subject. Through this diverse literature—spanning psychology, political science, religious studies, anthropology, and sociology—peace psychologist Dan Mayton gives readers the opportunity to view nonviolence as a body of principles, a system of pragmatics, and a strategy for social change. This important volume: Draws critical distinctions between nonviolence, pacifism, and related concepts. Classifies nonviolence in terms of its scope (intrapersonal, interpersonal, societal, global) and pacifism according to political and situational dimensions. Applies standard psychological concepts such as beliefs, motives, dispositions, and values to define nonviolent actions and behaviors. Brings sociohistorical and cross-cultural context to peace psychology. Analyzes a century’s worth of nonviolent social action, from the pathbreaking work of Gandhi and King to the Courage to Refuse movement within the Israeli armed forces. Reviews methodological and measurement issues in nonviolence research, and suggests areas for future study. Although more attention is traditionally devoted to violence and aggression within the social sciences, Nonviolence and Peace Psychology reveals a robust knowledge base and a framework for peacebuilding work, granting peace psychologists, activists, and mediators new possibilities for the transformative power of nonviolence.
