Two in the Saddle & Boone's Bounty-Vicki Lewis Thompson 2010-05-01 Two red-hot reads by New York Times and USA Today bestselling author Vicki Lewis Thompson Two in the Saddle Travis Evans loved beautiful women—and Gwen Hawthorne was definitely a beauty. But before he could make Gwen his, another tiny female stole his heart. Gwen might have been able to withstand Travis's sensual assault when he was just a charming cowboy. But when Don Juan turned into Mr. Mom, she was lost. Gwen knew her happiness was short-lived, though. Because where there was a baby, there had to be a mother.... Boone's Bounty Boone Connor liked being a loner. Women just got a guy into trouble—and Shelby McFarland had trouble written all over her. But Boone couldn't leave her and her young nephew stranded in a storm. Just as he couldn't help falling for her and her too-tempting body. But as good as they were together, Boone couldn't make Shelby any promises. Because he'd just discovered he had a baby girl....

Data Hiding-Michael T. Raggo 2012-12-31 As data hiding detection and forensic techniques have matured, people are creating more advanced stealth methods for spying, corporate espionage, terrorism, and cyber warfare all to avoid detection. Data Hiding provides an exploration into the present day and next generation of tools and techniques used in covert communications, advanced malware methods and data concealment tactics. The hiding techniques outlined include the latest technologies including mobile devices, multimedia, virtualization and others. These concepts provide corporate, government and military personnel with the knowledge to investigate and defend against insider threats, spy techniques, espionage, advanced malware and secret communications. By understanding the plethora of threats, you will gain an understanding of the methods to defend oneself from these threats through detection, investigation, mitigation and prevention. Provides many real-world examples of data concealment on the latest technologies including iOS, Android, VMware, MacOS X, Linux and Windows 7 Dives deep into the less known approaches to data hiding, covert communications, and advanced malware Includes never before published information about next generation methods of data hiding Outlines a well-defined methodology for countering threats Looks ahead at future predictions for data hiding

Old Hickory: Andrew Jackson and the American People-Albert Marrin 2004-12-16 From a childhood steeped in poverty, violence, and patriotic pride, Andrew Jackson rose to the heights of celebrity and power. The first popularly elected president, he won admiration by fighting corruption, championing the common man, shaping the power of the executive office, and preserving the fragile union of the young United States. Yet Jackson's ruthless pursuit of what he believed to be "progress" left indelible stains on the nation's conscience: broken treaties and the Trail of Tears are among Old Hickory's darker legacies. Vivid detail and unflinching analysis characterize Albert Marrin's fascinating rendering of the adventurous life, painful complexity, and continuing controversy that define the Age of Jackson.

Research in Chinese as a Second Language-Istvan Kecskes 2013-05-28 The book aims to address one of the main problems of Chinese language teaching: lack of research base. The rapidly growing interest in Chinese language teaching has not resulted in the development of a strong research background. This book attempts to change the current situation. The volume consists of three chapters. Chapter I: Research Base for Practice contains three papers, each of which uses research findings as a basis for solving issues connected with practical language teaching. Chapter II: Integrating Culture and Language is about one of the most intriguing topics of current language-oriented research: how to integrate culture into the process of language teaching. Chapter III: Acquisition of Language Structures consists of studies that investigate the acquisition of certain grammatical structures in Chinese. There are only a few papers in the literature on this issue, so the articles in this chapter are especially important for further research. One of the most important features of the volume is that each paper makes an attempt to bring together theory and practice by focusing on theory-building based on practice or theory application in practice. Thus the book can be recommended to both researchers and practitioners.

Current Trends in Theoretical Computer Science-G Rozenberg 1993-06-29 The book is a very up-to-date collection of articles in theoretical computer science, written by leading authorities in the field. The topics range from algorithms and complexity to algebraic specifications, and from formal languages and language-theoretic modeling to computational geometry. The material is based on columns and articles that have appeared in the EATCS Bulletin during the past two to three years. Although very recent research is discussed, the largely informal style of writing makes the book accessible to readers with little or no previous knowledge of the topics. Contents: Computational Geometry (H Edelsbrunner et al.) Algebraic Specification (H Ehrig et al.) On the Potential Role of Algebraic Specification within Computer Science (H Ehrig & P Pepper) Linking Schemas and Module Specifications: A Proposal (H Ehrig & M A Arbib) A Short Oxford Survey of Order Sorted Algebra (J Goguen & R Diaconescu) Logic in Computer Science (Y Gurevich et al.) On Kolmogorov Machines and Related Issues Topoi and Computation (A Blass) Structural Complexity (J Hartmanis et al.) Gödel, von Neumann and the P = ? NP Problem Counting Hierarchies: Polynomial Time and Constant Depth Circuits (E W Allender & K W Wagner) Formal Language Theory (A Salomaa et al.) Decidability in Finite Automata Parallel Communicating Grammar Systems (L Santean) and other papers Readership: Computer scientists, students and researchers. keywords: Theoretical Computer Science; Formal Methods; Algebraic Specification; Graph Transformation; Petri Net Technology; Integration; Consistency; Verification

Curious George Race Day (CGTV Reader)-H. A. Rey 2010-09-06 Curious George is helping Professor Wiseman train for a race, but she thinks running is boring. Can George find a way to show her that running is fun before the big race?

Curious and Curiouser-Dr Karl Kruszelnicki 2010-11-01 From the Master Geek and National Living Treasure "Dr Karl is Australia's incumbent President of Science" The Age "There's no topic on which Dr Karl does not have an interestingly expressed opinion" The Weekly Review "It is a great nuisance that knowledge can only be acquired by hard work." W. Somerset Maugham Are cooked mussels safe ONLY if they are open? Why does alcohol make the opposite sex more attractive? Why does washing your hands ease your conscience, make it easier to live with hard decisions, and make you more tolerant? Why does lightning strike the same place twice (and more)? Do babies get more illnesses when they are 'teething'? What is the science behind people spontaneously bursting into flames? And what's more hygienic - an air blower or a paper towel? Fans of Adam Spencer will love Curious and Curiouser.

Curious George Discovers the Ocean-H. A. Rey 2015-06-16 In this exciting new Curious George series all about discovery, George gets invited on a submarine trip to help retrieve a satellite that fell from space. He can't wait for his first adventure under the sea! Follow along as George explores the coral reef and discovers the different plants and creatures living near the ocean floor. Based on the Emmy-winning PBS show, this story is filled to the brim with additional facts, real photos, experiments, activities, and more. Learning about science has never been so much fun!

Curing Student Underachievement-Philip Esbrandt 2011 Cure Student Underachievement is the culmination of the authors' research, practice, and experience as principals, superintendents, graduate professors, and consultants in efforts to improve school performance and increase student achievement. Searching for the real causes of underperformance, the authors explored problem-solving strategies in several fields. The authors find that clinical practice identifies the root causes rather than the symptoms of problems, focusing valuable time, resource, and energy on prescriptions with greater promise for improved performance health. The concepts of diagnosis, prescription, and prognosis establish a foundation for improved planning and problem solving. This book introduces practicing leaders and leaders-in-training to the protocols of clinical practice by taking the reader through the twelve steps of the clinical cycle with specific strategies and exercises to provide practice in the application, use, and assessment of the model.

Current Economic Issues in EU Integration-M. Baimbridge 2004-08-23 This book examines selected pertinent topics on issues relating to current and future EU developments. In its initial sections, the book focuses on an array of wide ranging micro (agriculture, industry and competition) and macro (EMU, regional convergence and enlargement) issues. A final section is reserved for discussion on Britain's future relationship with the EU. In particular, the book posits possible alternative strategies (e.g. NAFTA membership and policy frameworks) and examines these from both a theoretical and empirical perspective.

Rethinking Christ and Culture-Craig A. Carter 2007-01-01 In 1951, theologian H. Richard Niebuhr published Christ and Culture, a hugely influential book that set the agenda for the church and cultural engagement for the next several decades. But Niebuhr's model was devised in and for a predominantly Christian cultural setting. How do we best understand the church and its writers in a world that is less and less Christian? Craig Carter critiques Niebuhr's still pervasive models and proposes a typology better suited to mission after Christendom.

Do World Bank and IMF Policies Work?-S. Khan 1999-05-10 The term 'structural adjustment' has been associated with rioting as angry and hungry masses protest food price increases due to subsidy cuts or due to other structural adjustment conditions prescribed by the IMF and the World Bank. Structural adjustment, and the neo-liberal paradigm that underlies it, is now the dominant economics paradigm practised by developing countries. The main purpose of the book is to rely on evidence and to go beyond rhetoric, ideology and anecdotes in assessing structural adjustment in Pakistan and the developing world more generally to examine how reform can be combined with pragmatism and social justice.

Curious George and the Puppies-H. A. Rey 2011-01-03 When George and the man with the yellow hat visit the animal shelter, George is delighted to discover a large litter of puppies. At first, George just wants to pet the puppy, but then he wants to hold one. George's curiosity gets the best of him, and soon puppies are everywhere. Fall 1998 marks the introduction of eight new Curious George Adventures available in three formats, hardcover, paperback, and paperboard. Fans will also enjoy Curious George in the Snow, Curious George Goes to a Movie, Curious George Goes to a Chocolate Factory, Curious George's Dream, Curious George Makes Pancakes, Curious George and the Hot Air Balloon, and Curious George Feeds the Animals.

Curiosity Killed the Cat Sitter-Blaise Clement 2007-01-02 Until three years ago, Dixie Hemingway was a deputy with the Sarasota County Sherriff's Department in southwest Florida. Then came a tragic accident. Now Dixie's a pet-sitter on Siesta Key, a lush, exotic barrier island where the people tend to be rich, suntanned, and tolerant of one another's quirks. As Dixie tried to get her life back in order, pet-sitting is the perfect job. She goes into people's homes while they're gone and takes care of their pets; she likes the animals, they like her, and she doesn't have to deal with people very much. She especially does not have to be afraid that she'll run into a situation that will cause her to lose her hard-won composure. But when Dixie finds a man bizarrely drowned in a cat's water bowl, she is drawn into a tangled web of danger and secrets. Unbeknownst to Lieutenant Guidry, the homicide detective handling the murder, Dixie begins her own investigation into the whereabouts of the cat's owner, who has now vanished. Fans of The Cat Who... book series by Lilian Jackson Braun will adore this riveting new pet-oriented sleuth and will eagerly await Dixie's next case: Will duplicity dog the dachshund?

BioIndustry Ethics-David L. Finegold 2005-07-19 This book is the first systematic, detailed treatment of the approaches to ethical issues taken by biotech and pharmaceutical companies. The application of genetic/genomic technologies raises a whole spectrum of ethical questions affecting global health that must be addressed. Topics covered in this comprehensive survey include considerations for bioprospecting in transgenics, genomics, drug discovery, and nutrigenomics, as well as how to improve stakeholder relations, design ethical clinical trials, avoid conflicts of interest, and establish ethics advisory boards. The expert authors represent multiple disciplines including law, medicine, bioinformatics, pharmaceuticals, business, and ethics.

Cumulative Subject and Author Index Including Tables of Contents-1998-09-15 Since its inception in 1966, the series of numbered volumes known as Semiconductors and Semimetals has distinguished itself through the careful selection of well-known authors, editors, and contributors. The "Willardson and Beer" Series, as it is widely known, has succeeded in publishing numerous landmark volumes and chapters. Not only did many of these volumes make an impact at the time of their publication, but they continue to be well-cited years after their original release. Recently, Professor Eicke R. Weber of the University of California at Berkeley joined as a co-editor of the series. Professor Weber, a well-known expert in the field of semiconductor materials, will further contribute to continuing the series' tradition of publishing timely, highly relevant, and long-impacting volumes. Some of the recent volumes, such as Hydrogen in Semiconductors, Imperfections in III/V Materials, Epitaxial Microstructures, High-Speed Heterostructure Devices, Oxygen in Silicon, and others promise indeed that this tradition will be maintained and even expanded. Reflecting the truly interdisciplinary nature of the field that the series covers, the volumes in

Semiconductors and Semimetals have been and will continue to be of great interest to physicists, chemists, materials scientists, and device engineers in modern industry.

Philosophy of Quantum Information and Entanglement-Alisa Bokulich
2010-06-10 Recent work in quantum information science has produced a revolution in our understanding of quantum entanglement. Scientists now view entanglement as a physical resource with many important applications. These range from quantum computers, which would be able to compute exponentially faster than classical computers, to quantum cryptographic techniques, which could provide unbreakable codes for the transfer of secret information over public channels. These important advances in the study of quantum entanglement and information touch on deep foundational issues in both physics and philosophy. This interdisciplinary volume brings together fourteen of the world's leading physicists and philosophers of physics to address the most important developments and debates in this exciting area of research. It offers a broad spectrum of approaches to resolving deep foundational challenges - philosophical, mathematical, and physical - raised by quantum information, quantum processing, and entanglement. This book is ideal for historians, philosophers of science and physicists.

Curiosity Thrilled the Cat-Sofie Kelly 2011 In this first installment in a brand-new series, small-town librarian Kathleen Paulson discovers that the two strays she has taken in--Owen and Hercules--are truly special when she, the prime suspect in a murder, gets some unexpected feline help in solving the crime and clearing her name. Cuneiform Texts and the Writing of History-Marc Van De Mierop
2005-08-08 Cuneiform Texts and the Writing of History discusses how the abundant Mesopotamian cuneiform text sources can be used for the study of various aspects of history: political, social, economic and gender. Marc Van De Mierop provides a student-friendly introduction to the subject and: * criticises disciplinary methodologies which are often informed by a desire to write a history of events * scrutinises the intellectual background of historical writings * examines how Mesopotamia's position as the 'other' in Classical and Biblical writings has influenced scholarship * illustrates approaches with examples taken from the entirety of Mesopotamian history.

The Quest Of The Overself-P Brunton 2011-10-31 'By far the safest and most rational exposition of Eastern metaphysics and the practice of mental discipline that I have read.' Spectator The Quest of the Overself shows Western readers how to achieve serenity of mind, control of thought and desire, and the power to use higher forces by means of simple exercises. These include breathing and visualisation as well as mental control through meditation. These ideas, which the author gained by extensive travel in India, are as relevant to us today as they were when first published in 1937. Paul Brunton was a British philosopher, mystic and traveler. He left a successful journalistic career to live among yogis and holy men and studied a wide variety of Eastern and Western esoteric spiritual traditions. As he explains in the still fresh and fascinating The Quest of the Overself, meditation and the quest for inner peace are by no means exclusively for monks and hermits but also support those living everyday, active lives in the West.

The Afro-Asian States and their Problems-K. M. Panikkar 2010-11-26
This reissue of Sandar Panikkar's 1959 book is based upon a series of lectures given at the Institut d'Etude de Development Economique et Social, which spotlights the problems faced by the multitude of African and Asian states which achieved independence between 1945 and 1957. From Asia, the author discusses the plight of India, Pakistan, Burma, Indonesia, Ceylon, Vietnam, Cambodia, Laos, Syria and Lebanon whilst in Africa he assesses the independence of the Sudan, Tunisia, Morocco and Ghana. The problems faced by these countries have many similarities, not least the need to develop systems of political organisation, administrative services necessary for a modern government and the need to completely reorganise their economy.

Curiosity Guides: The Human Genome-John Quackenbush 2011-02-01
The DNA sequence that comprises the human genome--the genetic blueprint found in each of our cells--is undoubtedly the greatest code ever to be broken. Completed at the dawn of a new millennium, the feat electrified

both the scientific community and the general public with its tantalizing promise of new and better treatments for countless diseases, including Alzheimer's, cancer, diabetes, and Parkinson's. Yet what is arguably the most important discovery of our time has also opened a Pandora's box of questions about who we are as humans and how the unique information stored in our genomes can and might be used, making it all the more important for everyone to understand the new science of genomics. In the CURIOSITY GUIDE TO THE HUMAN GENOME, Dr. John Quackenbush, a renowned scientist and professor, conducts a fascinating tour of the history and science behind the Human Genome Project and the technologies that are revolutionizing the practice of medicine today. With a clear and engaging narrative style, he demystifies the fundamental principles of genetics and molecular biology, including the astounding ways in which genes function, alone or together with other genes and the environment, to either sustain life or trigger disease. In addition, Dr. Quackenbush goes beyond medicine to examine how DNA-sequencing technology is changing how we think of ourselves as a species by providing new insights about our earliest ancestors and reconfirming our inextricable link to all life on earth. Finally, he explores the legal and ethical questions surrounding such controversial topics as stem cell research, prenatal testing, forensics, and cloning, making this volume of the Curiosity Guides series an indispensable resource for navigating our brave new genomic world.

Biblical Healing and Deliverance-Chester Kylstra 2014-08-12 Set the stage for unhindered healing. Rejection, depression, guilt, fear--evidence of spiritual bondage in today's world is rampant. The hurt is real, but so is the good news! In this groundbreaking, classic work, Chester and Betsy Kylstra show how you can trace pain and woundedness back to four foundational sources. True, lasting restoration and healing take place by dealing with these four sources together in an integrated way, instead of as separate areas. They are · release from ancestral sins and curses · replacement of destructive beliefs with godly ones · healing from emotional and spiritual pain · deliverance from demonic oppression This well-proven manual is designed for both personal recovery and ministry to others. In it, the Kylstras provide guiding Scriptures, step-by-step processes, self-inventories, visual aids, tables and real-life stories of people being restored through this integrated, fourfold approach. You can live free! Become who you are meant to be, and help others do the same. "I heartily recommend this book to all who would heal others or be healed themselves."--John Sandford, co-founder, Elijah House, Inc. "An outstanding, life-changing book!"--Dr. Ché Ahn, senior pastor, HROCK Church; co-founder, Harvest International Ministry "This book expresses the most balanced and workable ministry in the area of biblical healing that I have ever witnessed or experienced."--Dr. Bill Hamon, founder and bishop, Christian International Ministries Network "The Kylstras' systematic teaching will restore your foundations to be truly free in Christ."--John Arnott, founding pastor, Catch the Fire

Current Topics in Biochemistry 1973-Christian Boehmer Anfinsen 1974 Current Topics in Biochemistry 1973 is based on a series of lectures held at

the National Institutes of Health dealing with biochemistry. This group of lectures is the most recent in a program, which was established in the mid-1960s, to review various research fields for the scientific community at the Institutes. The topics for these series were chosen to emphasize active fields of general interest for a diverse audience of scientists. The speakers were therefore encouraged to present an overview of their fields rather than a detailed discussion of current research problems. The lectures in ...

Curious George Christmas Carols-H. A. Rey 2011-12-16 This beautiful holiday ebook includes the songbook lyrics and music notation for ten classic Christmas carols as illustrated by Curious George creator H. A. Rey, with more than 30 minutes of original recordings—just click on the page to play! Carols included are: "O Christmas Tree," "Deck the Halls," "We Three Kings," "Good King Wenceslas," "I Saw Three Ships," "O Come, All Ye Faithful," "The First Noel," "O Little Town of Bethlehem," "Hark! The Herald Angels Sing," and "Silent Night." Joyce Raskin, Chick Graning, Joe Propatier, of the popular band Scarce, and Matt White provide the original music. Singer, songwriter, and guitarist Joyce Raskin says, "Our band has reinterpreted H. A. Rey's traditional Christmas carols as a folksy, lighthearted, and kid-friendly set of recordings—a little Carter family, Mazzy Star, and Buddy Holly mixed together. We hope it's musical fun for kids of all ages." Featuring the playful and curious monkey George and original H. A. Rey illustrations, Curious George Christmas Carols is truly an e-book to treasure.
