**Leadership and Religious Schools**-Michael T. Buchanan 2013-01-17 Leadership in religious schools is a complex and often misunderstood subject. Educational leaders must perform the dual task of encouraging religious identities while relating them to wider issues of citizenship. Religious identity needs to be made relevant to the whole school community - parents, staff, students - and leaders need to take care to expand how human identity is conceived and manifested. Given these challenges, learning and leadership take on a special importance in faith-based and religious schools. This unique volume brings together leading international scholars in the field to explore the many dimensions of leadership: religious, faith, spiritual, ministerial, educational, and curriculum leadership. The contributors demonstrate, through case studies and grounded theory, that these schools require leaders who are conversant with a very wide range of styles and issues. Other issues discussed include styles of leadership, relationships with stakeholders, motivation, satisfaction and stress, school culture, and ethos and charisma. This is an insightful collection of essays that will be of great use to all those studying and researching school leadership.

**Neon Pilgrim**-Lisa Dempster 2017-08-01 During a culture-shocked exchange year in Japan, fifteen-year-old Lisa Dempster's imagination is ignited by the story of the henro michi, an arduous 1200 kilometre Buddhist pilgrimage through the mountains of Japan. Perfectly suiting the romantic view of herself as a dusty, travel-worn explorer (well, one day), she promises to return to Japan and walk the henro michi, one way or another, as soon as humanely possible. Fast-forward thirteen years, and Lisa's life is vastly different to what she pictured it would be. Severely depressed, socially withdrawn, overweight, on the dole and living with her mum, she is 28 and miserable. And then, completely by chance, the henro michi comes back into her life, through a book at her local library. It's a sign. She decides then and there to go back to Japan almost immediately: to walk the henro michi, and walk herself back to health. Brushing aside the barriers that other people might find daunting - the 1200km of mountainous terrain, the sweltering Japanese summer, the fact she has no money and has never done a multi-day hike before - Lisa is determined to walk the pilgrimage, or die trying.

**Moody Bitches**-Julie Holland 2016-02 As women, we learn from an early age that our moods are a problem. To succeed in life, we are told, we must have it all under control: we have to tamp down our inherent shifts in favor of a more static way of being. But our bodies are wiser than we imagine. Moods are not an annoyance to be stuffed away, they are a finely-tuned feedback system that can tell us how best to manage our lives. Our changing moods let us know when our bodies are primed to tackle different challenges and when we should be alert to developing problems. They help us select the right tool for each of our many jobs. If we deny our emotionality, we deny the breadth of our talents. With the right care of our inherently dynamic bodies, we can master our moods to avail ourselves of this great natural strength. Yet millions of American women are medicating away their emotions because our culture says that moodiness is a problem to be fixed. Over-prescribed medications can have devastating consequences for women in many areas of our lives--and even if we don't pop a pill, women everywhere are numbing their emotions with food, alcohol, and a host of addictive behaviors that deny the wisdom of our bodies and keep us from addressing the real issues that we face. Here, Dr. Julie Holland shares a better way.--From publisher description.

**Public Policy Making**-Larry N. Gerston 2015-05-18 This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.

A radical selection of key texts introduces the reader to the intense investigation of the modern European idea of the museum that has taken place over the last fifty years. Texts first published in journals and books are brought together in one volume with up-to-the-minute and specially commissioned pieces by leading administrators, curators and art historians. The selections are organized by key themes that map the evolution of the debate and introduced by Donald Preziosi and Claire Farago, two considerable critics, who write with the edge and enthusiasm of art historians who have spent their lives working with museums. Grasping the World is an invaluable resource for students and teachers of art history and museum studies.

**Introductory Papers on Dante**-Dorothy L. Sayers 2006-01-01 Introducing the Dante Papers Trilogy: Introductory Papers on Dante Further Papers on Dante The Poetry of Search and the Poetry of Statement This

introductory volume of essays on Dante by Dr. Dorothy L. Sayers will be eagerly sought by the many thousands of readers who already know her vigorous and vivid translation of the Inferno. As those who have heard Miss Sayer's lectures on Dante can testify, she brings to the interpretation of the Divine Comedy a vitalizing power of analysis and re-creation. Readers of Dante often become discouraged by the mass of factual detail which the older school of historical criticism has made available; mere aestheticism, however, unrelated to the time and space, is not likely to satisfy them either. They will find in Miss Sayers' essays enough scholarly assistance to put themselves in the position of a contemporary reader; but their attention will chiefly be drawn to the relevance of the Divine Comedy to our present day world and way of life. Miss Sayers' emphasis on the ethical, rather than on the aesthetic, or historical, significance of Dante's work, comes as a welcome and bracing challenge to the confusion regarding values, whether of literature or of life, which characterizes the present age.

**Architecture Oriented Otherwise**-David Leatherbarrow 2012-04-17 So much writing about architecture tends to evaluate it on the basis of its intentions: how closely it corresponds to the artistic will of the designer, the technical skills of the builder, or whether it reflects the spirit of the place and time in which it was built, making it not much more than the willful (or even subconscious) assemblage of objects that result from design and construction techniques. Renowned writer and thinker David Leatherbarrow, in this groundbreaking new book, argues for a richer and more profound, but also simpler, way of thinking about architecture, namely on the basis of how it performs. Not simply how it functions, but how it acts, "its manner of existing in the world," including its effects on the observers and inhabitants of a building as well as on the landscape that situates it. In the process, Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances, intended and otherwise, of buildings.

**The Middle East and North Africa**-Alasdair Drysdale 1985 Many of the political problems of the Middle East and North Africa have geographic roots, but material and ideas on spatial relationships in the region have, until now, remained scattered and piecemeal. In this original work, Drysdale and Blake examine the ways in which the geography and politics of the region are intertwined, and focus on the evolution and deficiencies of the contemporary political map. Organized around the themes of partition and integration, the discussion covers such timely issues as the Arab-Israeli conflict, Arab unity, the civil war in Lebanon, regional petroleum development, strategic straits, and the Iran-Iraq war. Throughout, this unique book is richly illustrated with specially drawn maps and diagrams.

**Discovery of Language**-Holger Pedersen 2015-06-26 Excerpt from *Discovery of Language: Linguistic Science in the Nineteenth Century* For the most part this work is a translation of Professor Pedersen's *Sprogvidenskaben i det Nittende Aarhundrede: Metoder og Resultater*, Copenhagen, Gyldendalske Boghandel, 1924, which appeared as Volume XV of *Det Nittende Aarhundrede*, an imposing series edited by Aage Friis and designed to present the cultural history of the nineteenth century in all its aspects. The relatively unimportant deviations from the original have been made either by the author or with his advice and consent. Scholarly works which have appeared since 1924, and are of such a nature as to affect the conclusions expressed in the original text, have been mentioned by the author in the translation; other changes include occasional amplification of a statement or the use of different examples. Word-forms thoroughly familiar to the Scandinavian reader might not be illuminating to the reader of an English translation, and therefore more appropriate examples have been selected in place of those on page 272, the first paragraph of page 273, and most of the first paragraph of page 274 of the Danish text. The way of

the translator is hard, as any one knows who has gone that way; especially hard when a work of a scholarly nature is involved, where extreme fidelity in translation is imperative. That way would not have been trod in the present instance if the translator had not thought he saw in the original certain cardinal virtues which would make the book a desirable addition to the English literature of linguistics. The problems, as well as the accomplishments, of the study of linguistics during this most important of centuries are faithfully and clearly recorded. Before each step in advance is described, the need for this step is pointed out, so that we have not merely a dry recital of events, but a story which gives us a series of living pictures of these pioneering intellects actually at work wrestling with problems the solution of which constitutes one chapter of the most stirring history we know, the history of the achievements of the human spirit in winning new knowledge. In spite of the tremendous advance in knowledge of the past century and a quarter, the results have not been incorporated in our general culture. The average cultivated person of today can be expected to know less than nothing of linguistics. About the Publisher Forgiven Books publishes hundreds of thousands of rare and classic books.
