It begins with an essay on "How to Read and Study the Bible" before proceeding to chapters that provide a thorough overview of each of the Bible's 66 books, summarizing each one's content, author, evidences of authenticity, and historical context. In addition to the full-color maps, photographs, reconstructions, and charts that equip readers throughout the volume, a smartphone-accessible QR code is included for each chapter that leads to related online teaching from noted Bible scholar Gene Getz. There's also an article by Jeremy Howard (general editor of the award-winning HCSB Study Bible) explaining how each book of the Old and New Testaments was accepted into the Bible.

**Court and Politics in Papal Rome, 1492-1700**-Gianvittorio Signorotto 2002-03-21 This 2002 book attempts to overcome the traditional historiographical approach to the role of the early modern papacy by focusing on the actual mechanisms of power in the papal court. The period covered extends from the Renaissance to the aftermath of the peace of Westphalia in 1648 - after which the papacy was reduced to a mainly spiritual role. Based on research in Italian and other European archives, the book concentrates on the factions at the Roman court and in the college of cardinals. The sacred college came under great international pressure during the election of a new pope, and consequently such figures as foreign ambassadors and foreign cardinals are examined, as well as political liaisons and social contacts at court. Finally, the book includes an analysis of the ambiguous nature of Roman ceremonial, which was both religious and secular: a reflection of the power struggle both in Rome and in Europe.

**Self-knowledge and Resentment**-Akeel Bilgrami 2006 In Self-Knowledge and Resentment, Akeel Bilgrami argues that self-knowledge of our intentional states is special among all the knowledges we have because it is not an epistemological notion in the standard sense of that term, but instead is a fallout of the radically normative nature of thought and agency. Four themes or questions are brought together into an integrated philosophical position: What makes self-knowledge different from other forms of knowledge? What makes for freedom and agency in a deterministic universe? What makes intentional states of a subject irreducible to its physical and functional states? And what makes values irreducible to the states of nature as the natural sciences study them? This integration of themes into a single and systematic picture of thought, value, agency, and self-knowledge is essential to the book's aspiration and argument. Once this integrated position is fully in place, the book closes with a postscript on how one might fruitfully view the kind of self-knowledge that is pursued in psychoanalysis.
