Jim Redman -Jim Redman 2013-10-18 The incredible rags-to-riches story of one of the world's greatest motorcycle racers. From humble beginnings in 1930s London, to winning six world titles, Jim Redman MBE is one of GP's most extraordinary characters, and a true legend of motorcycle racing. After migrating to South Africa, he started his racing career in the mid-fifties, and was awarded an MBE in 1964 - a year that also saw him win three World Championships in a single day, a feat, to this day, matched only by Mike Hailwood. During the mid-60s, Jim was THE man to beat on track, but a bad crash at the '66 Belgian GP ended his racing career. Following this, Jim was involved in a number of business ventures - including helping his two sons with their own successful sports careers, and owning a champion sire race horse - until, in 1995, he once again took up a career in racing as a Classic Racer and Demonstration Rider.
Cellar of Horror -Ken Engle 2013-09-24 Serial killer Gary Heidnik's name will live on in infamy, and his home, 3520 North Marshall Street in Philadelphia, is a house tainted with the memory of unbelievable horrors. What police found there was an incredible nightmare made real. Four young women had been held captive--some for four months--half-naked and chained. They had been tortured, starved, and repeatedly raped. But more grotesque discoveries lay in the kitchen: human limbs frozen, a torso burned to cinders, an empty pot suspiciously scorched... This is not a story for the faint-hearted. Cellar of Horror is a shocking true account of the self-proclaimed minister with a long history of mental illness, who preyed upon the susceptible in a bizarre plan to create his own "baby factory." It is a macabre web spun around money, power, and religion, tangled with courtroom drama and lawyers' tactics, sure to send a chill into your very soul.
Race Tech's Motorcycle Suspension Bible -Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

The Dream of the Factory-made House -Gilbert Herbert 1984 This is the story of what came to be known as the "packaged house," one of the few architect-inspired attempts to manufacture and market a prefabricated home. The plan began in the 1940s as a major collaborative effort between Walter Gropius, then at the height of his fame, and Konrad Wachsmann, a rising star-both in exile from their native Germany. For both men, this was the culmination of many years of experience in the field of industrialized housing and an unparalleled opportunity to make their long-cherished dream of a factory-made house a reality. How did this venture, which seemed to have everything going for it, turn out to be such a dismal failure? The answers to that question make this one of the most fascinating studies in the annals of modern architecture. Gilbert Herbert's analysis of the bold undertaking has within it not only the elements of personal drama, as far as Gropius and Wachsmann are concerned, but it unfolds consequences of more drastic significance for the development of industrially-produced housing the world over. Both architects represented a formidable combination of ability and experience; both had contributed significantly to the theory and practice of prefabrication, and had devised a system that was technically impeccable. That "only a small number of these immaculately conceived and engineered houses was actually sold" was not only a great disappointment for them, it was a grave shock to the whole movement for industrially-produced housing. The facts of the Gropius-Wachsmann case--now fully disclosed with extensive visual documentation--are instructive in themselves. But the real significance of this book lies in its ability to relate the facts to the history of industrialized housing and to the modern architect's confrontation with technological, economic, and social forces.

Homer Simpson Ponders Politics-Joseph J. Foy 2013-05-14 It is often said that the poet Homer "educated" ancient Greece. Joseph J. Foy and Timothy M. Dale have assembled a team of notable scholars who argue, quite persuasively, that Homer Simpson and his ilk are educating America and offering insights into the social order and the human condition. Following Homer Simpson Goes to Washington (winner of the John G. Cawelti Award for Best Textbook or Primer on American and Popular Culture) and Homer Simpson Marches on Washington, this exceptional volume reveals how books like J. R. R. Tolkien's The Hobbit and J. K. Rowling's Harry Potter, movies like Avatar and Star Wars, and television shows like The Office and Firefly define Americans' perceptions of society. The authors expand the discussion to explore the ways in which political theories play out in popular culture. Homer Simpson Ponders Politics includes a foreword by fantasy author Margaret Weis (coauthor/creator of the Dragonlance novels and game world) and is divided according to eras and themes in political thought: The first section explores civic virtue, applying the work of Plato and Aristotle to modern media. Part 2 draws on the philosophy of Hobbes, Locke, Rousseau, and Smith as a framework for understanding the role of the state. Part 3 explores the work of theorists such as Kant and Marx, and the final section investigates the ways in which movies and newer forms of electronic media either support or challenge the underlying assumptions of the democratic order. The result is an engaging read for undergraduate students as well as anyone interested in popular culture.

Riding Man-Mark Gardiner 2012-07-15 For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.
