Education and the Commercial Mindset-Samuel E. Abrams 2016-05-02 The movement to privatize K-12 education is stronger than ever. Samuel Abrams examines the rise of market forces in public education and reveals how a commercial mindset that sidesteps fundamental challenges has taken over. Nevertheless, public schools should adopt lessons from the business world, such as raising teacher salaries to attract talent.

Distributed Sensor Systems-Habib F. Rashvand 2012-02-21 This book focuses on the distinct but tightly inter-related areas of development for distributed sensing systems In this book, the authors discuss the technological developments lead by sensor technology, addressing viable new applications to inspire a technological evolution. Under the advanced and visionary approach of distributed intelligence, the authors focus on three distinct but tightly inter-related areas of developments for distributed sensing systems (DSS): firstly, the sensor technology embracing the conversion of the phenomena of interest into desirable form of signal such as electric, secondly, the interaction process between sensing points which requires immense intelligence loosely called networking, and finally, the adoption of useful maturing systems through potential applications for right impacts for a better life and a brighter economy. Furthermore, the book contains a number of case studies and typical applications illustrating the technical details, features and functions of the systems, as well as demonstrating their benefits and limitations. Key Features: Discusses the technological developments lead by sensor technology Addresses viable new applications Contains a number of case studies and typical applications illustrating the technical details, features and functions of the systems Demonstrates the benefits and limitations of distributed sensing Written by experts with vast experience in the field (both in academia and industry) This book will be an invaluable reference for postgraduates studying related courses (communication engineering, engineering management, computer systems, industrial process, automation, design, environmental, urban, surveillance), R&D engineers, system and application designers, researchers, industrial project managers and engineers, and technical and strategic managers planning new products.

The Phantom of the Opera-Gaston Leroux 1911 The story of the Phantom of the Opera, a half-crazed musician hiding in the labyrinth of the famous Paris Opera House and creating a number of strange and mysterious events to further the career of a beautiful young singer, is today regarded as one of the most famous of all horror stories: widely mentioned in the same breath as Frankenstein and Dracula. Yet the fame of this novel is based almost entirely on the various film versions, while the original book has been largely ignored and is rarely in print. An Accelerated Reader® Title

Snow Goer's Vintage Snowmobiles-David Wells 2017-08-01 Snow Goer magazine has combed its comprehensive archive of articles from long-time contributor David Wells to assemble a collection of profiles of the most interesting machines that the sport has ever seen. There is an impressive array of machines, including sleds from the four surviving major brands--Polaris, Ski-doo, Yamaha, and Arctic Cat--and many other well-known names like Ariens, Bolens, Evinrude, and Johnson, and even some obscure names like Roll-O-Flex and Dauphin. In addition to the profiles, there are background features on "Snowbikes" through the years, a look at "rebadging," and an in-depth flashback to the fabulous factory speed run and stock racing wars of the early 1970's.

The Future of Technology-Tom Standage 2005-08-01 From the industrial revolution to the railway age, through the era of electrification, the advent of mass production, and finally to the information age, the same pattern keeps repeating itself. An exciting, vibrant phase of innovation and financial speculation is followed by a crash, after which begins a longer, more stately period during which the technology is actually deployed properly. This collection of surveys and articles from The Economist examines how far technology has come and where it is heading. Part one looks at topics such as the "greying" (maturing) of IT, the growing importance of security, the rise of outsourcing, and the challenge of complexity, all of which have more to do with implementation than innovation. Part two looks at the shift from corporate computing towards consumer technology, whereby new technologies now appear first in consumer gadgets such as mobile phones. Topics covered will include the emergence of the mobile phone as the "digital Swiss Army knife"; the rise of digital cameras, which now outsell film-based ones; the growing size and importance of the games industry and its ever-closer links with other more traditional parts of the entertainment industry; and the social impact of technologies such as text messaging, Wi-Fi, and camera phones. Part three considers which technology will lead the next great phase of technological disruption and focuses on biotechnology, energy technology, and nanotechnology.

The Laws of Cool-Alan Liu 2004-10-01 Knowledge work is now the reigning business paradigm and affects even the world of higher education. But what perspective can the knowledge of the humanities and arts contribute to a world of knowledge work whose primary mission is business? And what is the role of information technology as both the servant of the knowledge economy and the medium of a new technological cool? In The Laws of Cool, Alan Liu reflects on these questions as he considers the emergence of new information technologies and their profound influence on the forms and practices of knowledge.

Earth Science-Edward J. Tarbuck 2012 Ideal for undergraduates with little or no science background, Earth Science is a student-friendly overview of our physical environment that offers balanced, up-to-date coverage of geology, oceanography, astronomy, and meteorology. The authors focus on readability, with clear, example-driven explanations of concepts and events. The Thirteenth Edition incorporates a new active learning approach, a fully updated visual program, and is available for the first time with MasteringGeology--the most complete, easy-to-use, engaging tutorial and assessment tool available, and also entirely new to the Earth science course.

Arlynn and John-John Curtis Knight 2012-03-16 In her eighty-four years, Arlynn Swope endured many of lifes greatest challenges. She knew illness, poverty, a near-death pregnancy, mental illness in her immediate family, and the suicide of her husband. She lived through the Great Depression and dropped out of school in the ninth grade to help her family survive the 1930s. But through it all, she faced each of the many rocks in her road with love and grit. Hers is an uncommon tale from a most common Hoosier woman, the little woman who was never little but was always there for those she loved. A veteran of the US Navy with an eleventh-grade education, John Curtis Knight didnt know what he was in for when he fell crazy in love with Arlynn. A welder and factory worker by trade, he built a reputation as a top amateur golfer who became a real player on his native Indiana courses. His life was built around Arlynn and their family, and they shared a rich adventure togetheruntil despair and paranoia led to his suicide when he was seventy-eight. Theirs is a true love story, one in which these two common Hoosiers share a life of uncommon love. Together they walked, pushed, pulled, and loved their way through it all.

1983-Taylor Downing 2018-04-24 A riveting, real-life thriller about 1983--the year tensions between the United States and the Soviet Union nearly brought the world to the point of nuclear Armageddon The year 1983 was an extremely dangerous one--more dangerous than 1962, the year of the Cuban Missile Crisis. In the United States, President Reagan vastly increased defense spending, described the Soviet Union as an "evil empire," and launched the "Star Wars" Strategic Defense Initiative to shield the country from incoming missiles. Seeing all this, Yuri Andropov, the paranoid Soviet leader, became convinced that the US really meant to attack the Soviet Union and he put the KGB on high alert, looking for signs of an imminent nuclear attack. When a Soviet plane shot down a Korean civilian jet, Reagan described it as "a crime against humanity." And Moscow grew increasingly concerned about America's language and behavior. Would they attack? The temperature rose fast. In November the West launched a wargame exercise, codenamed "Abel Archer," that looked to the Soviets like the real thing. With Andropov's finger inching ever closer to the nuclear button, the world was truly on the brink. This is an extraordinary and largely unknown Cold War story of spies and double agents, of missiles being readied, intelligence failures, misunderstandings, and the panic of world leaders. With access to hundreds of astonishing new documents, Taylor Downing tells for the first time the gripping but true story of how near the world came to nuclear war in 1983.

Theories in Educational Psychology-Alyssa R. Gonzalez-DeHass 2012-12-14 Theories in Educational Psychology's purpose is to introduce readers to the pioneering educational psychology theories that continue to shape our understanding of the classroom learning environment, present support for the theories from perspectives in the current research literature, and share how these theoretical traditions have translated into effective teaching methods.

A Reader's Guide to Wallace Stevens-Eleanor Cook 2009-03-09 Wallace Stevens is one of the major poets of the twentieth century, and also among the most challenging. His poems can be dazzling in their verbal brilliance. They are often shot through with lavish imagery and wit, informed by a lawyer's logic, and disarmingly unexpected: a singing jackrabbit, the seductive Nanzia Nunzio. They also spoke--and still speak--to contemporary concerns. Though his work is popular and his readership continues to grow, many readers encountering it are baffled by such rich and strange poetry. Eleanor Cook, a leading critic of poetry and expert on Stevens, gives us here the essential reader's guide to this important American poet. Cook goes through each of Stevens's poems in his six major collections as well as his later lyrics, in chronological order. For each poem she provides an introductory head note and a series of annotations on difficult phrases and references, illuminating for us just why and how Stevens was a master at his art. Her annotations, which include both previously unpublished scholarship and interpretive remarks, will benefit beginners and specialists alike. Cook also provides a brief biography of Stevens, and offers a detailed appendix on how to read modern poetry. A Reader's Guide to Wallace Stevens is an indispensable resource and the perfect companion to The Collected Poems of Wallace Stevens, first published in 1954 in honor of Stevens's seventy-fifth birthday, as well as to the 1997 collection Wallace Stevens: Collected Poetry and Prose.

The Norconian Resort-Kevin Bash 2007 The Norconian Resort Supreme was a magnificent disaster. A chance discovery of "hot sulfur water" in 1926 led entrepreneur Rex Clark to construct one of the finest and most comprehensive recreation facilities on the West Coast. Movie stars, Olympic champions, and the richest of the rich flocked to it. Sadly the Norconian debuted just months before the onset of the Great Depression, and very quickly Rex Clark's \$4.5-million dream became known as "Rex's Folly." The resort eventually became one of the preeminent naval hospitals in the nation, a top-secret think tank, and a medium-security prison. Miraculously most of the original structures still exist. The old hotel, despite its placement on the National Register of Historic Places, has become a political hot potato and now sits languishing in the middle of the California Rehabilitation Center--abandoned yet stunning, with fabulous chandeliers, tile work, and breathtaking paintings still intact.

Vintage Snowmobilia-Jon Bertolino 2006-11-01 The Golden Age of snowmobile manufacturing went from 1968 to 1976. During this time literally hundreds of snowmobile manufacturers sprang up and then disappeared. Some of these manufacturers were huge blue chip corporations like John Deere. Others were small forgotten companies building sleds in home garages such as the Snow Bug. The collector market for vintage snowmobile items can be easily compared to the interest in vintage motorcycles, farm tractors, gas station items, vintage boats and outboards and similar motorized vehicles. This book covers snowmobile-related items which are

now collectible-vintage brand-specific clothing, advertising items, dealer signs, oil containers, snowmobile board games, snowmobile cuff links, and much more. Collectors new and old are trying to determine what an item is worth and if it is collectible. This is the first book to fill that need.

Sworn to Protect-DiAnn Mills 2010-05-12 Two years ago, her husband was shot and killed trying to help undocumented immigrants, the very people Danika, a Border Patrol agent, is responsible for deporting. His murder was never solved. Now a recent string of attacks and arrests leads Danika to believe her husband's death may have been part of a larger conspiracy, and it appears that she's the next target. With the help of the only person she can trust she searches for answers before more innocent lives are destroyed.

Dragon Shift-Clarissa Gosling 2020-12-17 Half-bear-shifter half-dragon in a world where dragons are thought extinct, Birgith must face the ultimate test of her shifting ability to be accepted as an adult in the Bear-shifter clan. If Birgith manifests any sign that she has dragon blood she will be killed immediately and her dragon family hunted, as they are feared by all four clans in the continent of Kaitstud. But when the test comes, she is unable to shift at all. So she is exiled and classed as a human, with all the restrictions on her that designation entails. Leaving behind everything she's ever known, Birgith sets out on a perilous journey away from her forest home to make peace with her dual heritage. A journey to find her hidden dragon family. A journey that puts her life and theirs at risk. Or that will help her embrace who she truly is. The first in an exciting new series for readers who love magic, adventure and strong female characters. Preorder now so you don't miss out!
