Fire in the Darkness-Stacey Marie Brown 2017-06-15 It's been four weeks since Ember Brycin witnessed what her powers are capable of. The Electrical Current Storm has turned Seattle, Washington into a natural disaster zone. The death toll is in the thousands with countless others homeless and hungry. And Ember is the one who caused it. Something she will have to live with every day. Those people who were unable to escape either turned quickly into gangs or live in shelters. Ember, on the other hand, can't do either. With a price on her head and a Dark Dweller on her ass, she is constantly on the move. Both Light and Dark are hunting her for their own purpose to use her as a weapon or a pawn in the war between the Unseelie King of the Dark and the Seelie Queen of the Light. Em needs help but doesn't know who to trust: Lars, the mystery man Torin told her to find? Torin, the Seelie Queen's personal knight, who has sworn to keep Em safe? Or Eli, who wants to turn her over to the Unseelie King, but whom she has an undeniable, intense connection with? No matter what she chooses she will probably lose--her life or everything and everyone she loves.

How To Have A Beautiful Mind-Edward de Bono 2010-01-26 People spend a fortune on their bodies, their faces, their hair, their clothes. Cosmetics, plastic surgery, diets, gym membership - everyone's trying to be more attractive. But there's an easier way to become a beautiful person. It doesn't have to be physical. No matter how you look, if you have a mind that's fascinating, creative, exciting - if you're a good thinker - you can be beautiful. And being attractive doesn't necessarily come from being intelligent or highly-educated. It isn't about having a great personality. It's about using your imagination and expanding your creativity. And it's when talking with people that we make the greatest impact. A person may be physically beautiful, but when speaking to others a dull or ugly or uncreative mind will definitely turn them off. In clear, practical language, de Bono shows how by applying lateral and parallel thinking skills to your conversation you can improve your mind. By learning how to listen, make a point, and manoeuvre a discussion, you can become creative and more appealing - more beautiful.

He's learned to annihilate zombies and raise the dead, divination and clairvoyance, so why is learning to drive and keep a girlfriend so dang hard? But that isn't the primary skill he has to master. Survival is. And in order to survive, his next lesson makes all the others pale in comparison. He is on the brink of becoming either the greatest hero mankind has ever known. Or he'll be the one who ends the world. With enemies new and old gathering forces, he will have to call on every part of himself to fight or he'll lose everyone he cares about. Even himself.

Architecture Oriented Otherwise-David Leatherbarrow 2012-04-17 So much writing about architecture tends to evaluate it on the basis of its intentions: how closely it corresponds to the artistic will of the designer, the technical skills of the builder, or whether it reflects the spirit of the place and time in which it was built, making it

not much more than the willful (or even subconscious) assemblage of objects that result from design and construction techniques. Renowned writer and thinker David Leatherbarrow, in this groundbreaking new book, argues for a richer and more profound, but also simpler, way of thinking about architecture, namely on the basis of how it performs. Not simply how it functions, but how it acts, "its manner of existing in the world," including its effects on the observers and inhabitants of a building as well as on the landscape that situates it. In the process, Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances, intended and otherwise, of buildings.
