Ivy-League educated Anna Taggert believes that enriching the minds of America's youth is the greatest gift, and that landing a job at an elite Manhattan school is her lucky break. But when the grim reality of the private school hierarchy settles in, not to mention that of her meager compensation, Anna realizes that passion might not be worth the sacrifice. Ever the optimist, Anna forges on until she discovers that the papers she grades are not the work of her students, but of their high-priced, college-educated tutors. After uncovering this underground economy, where a teacher can make the same hourly rate as a Manhattan attorney, Anna is seduced by lucrative offers--one after another. Teacher by day, tutor by night, she starts to sample the good life her students enjoy: binges at Barneys, dinners at the Waverly Inn, and a new address on Madison Avenue. Until, that is, Anna gets schooled.

Urban Poverty in China-Fulong Wu 2010-01-01 Wow! What a tour de force! This timely, masterly work does everything, from broad empirical comparison to theory, quantitative correlation to case studies of neighborhoods and quotations

from individual life histories. Its findings from 25 neighborhoods in six cities demonstrate convincingly that urban destitution is not homogeneous, is concentrated in and generated by location, and has patterned institutional roots that produced varying processes of pauperization. This superb book must put to rest once and for all references to Chinese poverty as a matter of just the rural areas and their residents. Dorothy J. Solinger, University of California, Irvine, US Market reform has brought new forms of poverty to urban China, even while the standard of living of most urban residents has greatly improved. This research uses interviews with people in six cities to document their situation and to show how poverty is rooted in the failure of support systems in their neighborhoods and communities. It offers a stark evaluation of a system of inequalities that is only beginning to be addressed by state policy. John R. Logan, Brown University, US Urban poverty is an emerging problem. This book explores the household and neighbourhood factors that lead to both the generation and continuance of urban poverty in China. It is argued that the urban Chinese are not a homogenous social group, but combine laid-off workers and rural migrants, resulting in stark contrasts between migrant and workers neighbourhoods and villages. The expert authors examine the new urban poor in China and the dynamics of their poor neighbourhoods, highlighting both household experience and neighbourhood changes affecting the urban poor. Urban Poverty in China is based upon a comprehensive household survey in six Chinese cities and provides insights into microscopic and neighbourhood-level poverty dynamics. The comprehensive study explores the spatial implications such as concentration of poverty as well as the differentiation within poor neighbourhoods. This informative book tells an insightful story about evolving urban poverty in Chinese cities that will be invaluable to researchers and postgraduate students within urban studies, geography, social policy and development studies as well as Chinese and Asian studies. It will also prove to be an invaluable read for researchers in urban and social development and international development agencies.
