**Citizen Coke: The Making of Coca-Cola Capitalism**-Bartow J. Elmore 2014-11-03 "Citizen Coke demonstrate[s] a complete lack of understanding about . . . the Coca-Cola system—past and present." —Ted Ryan, the Coca-Cola Company How did Coca-Cola build a global empire by selling a low-price concoction of mostly sugar, water, and caffeine? The easy answer is advertising, but the real formula to Coke’s success was its strategy, from the start, to offload costs and risks onto suppliers, franchisees, and the government. For most of its history the company owned no bottling plants, water sources, cane- or cornfields. A lean operation, it benefited from public goods like cheap municipal water and curbside recycling programs. Its huge appetite for ingredients gave it outsized influence on suppliers and congressional committees. This was Coca-Cola capitalism. In this new history Bartow J. Elmore explores Coke through its ingredients, showing how the company secured massive quantities of coca leaf, caffeine, sugar, and other inputs. Its growth was driven by shrewd leaders such as Asa Candler, who scaled an Atlanta soda-fountain operation into a national empire, and “boss” Robert Woodruff, who nurtured partnerships with companies like Hershey and Monsanto. These men, and the company they helped build, were seen as responsible citizens, bringing jobs and development to every corner of the globe. But as Elmore shows, Coke was usually getting the sweet end of the deal. It continues to do so. Alongside Coke’s recent public investments in water purification infrastructure, especially in Africa, it has also built—less publicly—a rash of bottling plants in dangerously arid regions. Looking past its message of corporate citizenship, Elmore finds a strategy of relentless growth. The costs shed by Coke have fallen on the public at large. Its annual use of many billions of gallons of water has strained an increasingly scarce global resource. Its copious servings of high-fructose corn syrup have threatened public health. Citizen Coke became a giant in a world of abundance. In a world of scarcity it is a strain on resources and all who depend on them.

**Totally Spring**-Sherrill B. Flora 1990-06

**Oh, Florida!**-Craig Pittman 2016-07-05 A New York Times Bestseller Oh, Florida! That name. That combination of sounds. Three simple syllables, and yet packing so many mixed messages. To some people, it’s a paradise. To others, it’s a punch line. As Oh, Florida! shows, it’s both of these and, more important, it’s a Petri dish, producing trends that end up influencing the rest of the country. Without Florida there would be no NASCAR, no Bettie Page pinups, no Glenn Beck radio rants, no USA Today, no “Stand Your Ground,” . . . you get the idea. To outsiders, Florida seems baffling. It’s a state where the voters went for Barack Obama twice, yet elected a Tea Party candidate as governor. Florida is touted as a carefree paradise, yet it’s also known for its perils-alligators, sinkholes, pythons, hurricanes, and sharks, to name a few. It attracts 90 million visitors a year, some drawn by its impressive natural beauty, others bewitched by its manmade fantasies. Oh, Florida! explores those contradictions and shows how they fit together to make this the most interesting state. It is the first book to explore the reasons why Florida is so wild and weird-and why that’s okay. Florida couldn’t be Florida without that sense of the unpredictable, unexpected, and unusual lurking behind every palm tree. But there is far more to Florida than its sideshow freakiness. Oh, Florida! explains how Florida secretly, subtly influences all the other states in the Union, both for good and for ill.

**Military Industry and Regional Defense Policy**-Timothy D. Hoyt 2017-07-05 Military Industry and Regional Defense Policy re-examines military industrialization in the developing world, focusing on policy-making in producer states and the impact of security perceptions on such policy-making.Timothy D. Hoyt reassesses the role of regional state sub-systems in international relations, and recent historical studies of international technology and arms transfers. Looking at Israel, Iraq and India, the three most powerful regional powers in the Cold War era, he presenats an expert analysis of the three-sided phenomena of the regional hegemony, the regional competitor and the small over-achiever.This new book breaks away from existing literature on military industries in the developing world, which has focused on their economic and development costs and benefits. These past studies have used primitive methodologies that focus on the production of complete weapons systems - a

misleading gauge in a world of growing international defense cooperation. They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict, and of the defence planning and concerns that drove development of indigenous military industries in key regional powers. This new text delivers an incisive new perspective.
