<p>Scouting for Girls; Official Handbook of the Girl Scouts-Girl Scouts Of The America 2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 edition. Excerpt: ...SECTION XVIII GIRL SCOUT PROFICIENCY TESTS AND SPECIAL MEDALS For details regarding these badges see the "BLUE BOOK OF RULES FOR GIRL SCOUT CAPTAINS" Proficiency Tests and Merit Badges 1. INTRODUCTION A girl must be a Second Class Scout before receiving a Merit Badge in any subject. However, this does not mean that she cannot begin to study her subject and plan for passing the test at any time. Proficiency in these tests is to be determined by the Local Council, or by persons competent (in the opinion of the Council) to judge it. If no Local Council exists, certificates should be secured from persons competent to judge each subject, such as teachers of music, dancing or drawing, riding masters, motorists, electricians, milliners, dressmakers, artists, craftsmen, scientists and so forth. These certificates should be sent to the National Headquarters or to the nearest District Headquarters for inspection. Headquarters will either pass on these, or indicate the nearest local body competent to deal with them. The tests as given are topical outlines of what a Scout should know about the subject rather than formal questions. Captains and others giving the tests will adapt the wording to the needs of the particular case. With many subjects a list of standard references is given. It is desirable that a girl should read at least one of these books, not in order to pass an examination but that she may be familiar with the general field and the great names and principles associated with it. Where a whole troop is working on a subject, portions of the books may be read at troop meetings, or several Scouts can read together and discuss their Impressions. It is important that every Girl Scout should understand that the winning of any one of the...</p>
<p>Australian Tractors-Graeme R. Quick 2006 Australia has some of the world's largest and most labor-efficient farms, and tractors are an essential part of their operations. The average Australian farm has three or more tractors. In this historical overview, the author documents the development of the indigenous tractor industry, from the McDonald Imperial of 1909 to more recent cane, olive, and grape harvesters. Australian Tractors puts the industry in an economic and social history context.</p>

This book, in a style which is both inspiring and practical, provides some of the Churchs most important wisdom about how to respond to this call.</p>
<p>Handbook of Analytical Instruments-Khandpur 2006-01-01 Analytical Instrumentation offers powerful qualitative and quantitative techniques for analysis in chemical, pharmaceutical, clinical, food-processing laboratories and oil refineries. It also plays a critical role in the monitoring and control of environment pollution. Over the years, this field has become extremely sophisticated. Today, microcontrollers and personal computers have been integrated into analytical instruments. This has brought in automation, efficiency and precision in analytical instrumentation. To keep users abreast of such advances, this edition of the Handbook of Analytical Instruments describes the principles and building blocks of analytical instrumentation. Recent advances in bio-sensors, gamma spectrometry, electron spin resonance (ESR) spectrometry, visualization methods for electrophoresis and several other tools and techniques of analytical instrumentation have been covered. In order to ensure that readers make the right decision, in terms of the instrument that best meets their requirements, the book includes a discussion of analytical instruments from various manufacturers. Useful for..... ¿ Supervisors and technicians in clinical, pharmaceutical, food-processing laboratories and oil refineries. ¿ Personnel concerned with the monitoring and control of environmental pollution ¿ Service and maintenance engineers ¿ Post-graduate students of physics and chemistry undergoing courses in instrument analysis ¿ Students of instrumentation, electronics and chemical engineering</p>
<p>The Tractor Story-Duncan Wherrett 2011-08-01 "Over 100 tractors, stretching back over 100 years--from the first steam engines on wheels produced by ingenious engineers in the garden shed, to the mighty multinational John Deere. <p>Anecdotes to Kill Time-MJ 2017-01-10 Anecdotes to Kill Time is a bunch of short stories that portrays different shades of romance. This book is sure to bring smile on each reader's face at the end. The author has offered a six tales that are never like what they seem to be. The stories are written in such a manner that, they are equal blend of humour and romance in them. Each one has a unique twist of its own. Stories are written deliberately in a manner that the reader could predict the end, which he cannot. There is a young man who turned the tables and got the life he wanted! There is an orthodox brother who struggles to accept his sister's boyfriend. Two students visit a college that rusticated them. Likewise, there are few other tales where in each tale takes a different path and offers cent percent pleasure to the reader. Are you someone who is looking for stories that are fiction yet they sound realistic! The book that you are holding right now will full fill that wish of yours! Remember, this book is strictly for youth!</p>

From Eve to Evolution-Kimberly A. Hamlin 2014-05-08 From Eve to Evolution provides the first full-length study of American women’s responses to evolutionary theory and illuminates the role science played in the nineteenth-century women’s rights movement. Kimberly A. Hamlin reveals how a number of nineteenth-century women, raised on the idea that Eve’s sin forever fixed women’s subordinate status, embraced Darwinian evolution—especially sexual selection theory as explained in The Descent of Man—as an alternative to the creation story in Genesis. Hamlin chronicles the lives and writings of the women who combined their enthusiasm for evolutionary science with their commitment to women’s rights, including Antoinette Brown Blackwell, Eliza Burt Gamble, Helen Hamilton Gardener, Charlotte Perkins Gilman, and Elizabeth Cady Stanton. These Darwinian feminists believed evolutionary science proved that women were not inferior to men, that it was natural for mothers to work outside the home, and that women should control reproduction. The practical applications of this evolutionary feminism came to fruition, Hamlin shows, in the early thinking and writing of the American birth control pioneer Margaret Sanger. Much scholarship has been dedicated to analyzing what Darwin and other male evolutionists had to say about women, but very little has been written regarding what women themselves had to say about evolution. From Eve to Evolution adds much-needed female voices to the vast literature on Darwin in America.

<p>Beyond the Veil-Nolan Webber 2015-10-05 Distraught by the death of his brother and weary from the torment from bullies, twelve year old Devin no longer enjoys life until he discovers an enormous emerald within an engraved chest. The emerald gryphon egg is a gift from Lady Gladislynn, a dryad that searches for the Forgotten; descendants from the parallel world of Midgard which is concealed by a veil of magic. Devin's life is rejuvenated by raising the mythical beast however it disappears after an attack by creatures from beyond the Veil. When the gryphon Alar returns, he takes Devin into Midgard, a world ravaged by a horde of vicious chimera ruled over by the demonic goddess known as the Mother of All. Devin eagerly joins Alar and the elves, known as alfar, in their war for survival. Facing a losing battle, the Pride and the alfar grudgingly accept the aid of the sinister dock-alfar Magnus who leads Devin to the Mother's lair but at a terrible cost to the alfarian king whose relationship with Magnus threatens his throne.</p>
<p>Unlearning Meditation-Jason Siff 2010-07-06 When we meditate, our minds often want to do something other than the meditation instructions we’ve been taught. When that happens repeatedly, we may feel frustrated to the point of abandoning meditation altogether. Jason Siff invites us to approach meditation in a new way, one that honors the part of us that doesn’t want to do the instructions. He teaches us how to become more tolerant of intense emotions, sleepiness, compelling thoughts, fantasies—the whole array of inner experiences that are usually considered hindrances to meditation. The meditation practice he presents in Unlearning Meditation is gentle, flexible, permissive, and honest, and it’s been wonderfully effective for opening up meditation for people who thought they could never meditate, as well as for injecting a renewed energy for practice into the lives of seasoned practitioners.</p>

Progress in Nonequilibrium Green's Functions-Michael Bonitz 2000-05-11 Equilibrium and nonequilibrium properties of correlated many-body systems are of growing interest in many fields of physics, including condensed matter, dense plasmas, nuclear matter and particles. The most powerful and general method which applies equally to all these areas is given by quantum field theory. Written by the leading experts and understandable to non-specialists, this book provides an overview on the basic ideas and concepts of the method of nonequilibrium Green's functions. It is complemented by modern applications of the method to a variety of topics, such as optics and transport in dense plasmas and semiconductors; correlations, bound states and coherence; strong field effects and short-pulse lasers; nuclear matter and QCD. Authors include: Gordon Bayan, Pawel Danielewicz, Don DuBois, Hartmut Haug, Klaus Henneberger, Antti-Pekka Jauho, Jörn Knoll, Dietrich Kremp, Pavel Lipavsky and Paul C Martin. Contents:Kadanoff-Baym Equations: History and PerspectivesGeneral Problems of Quantum Kinetic TheoryPlasmasSemiconductors. OpticsQuantum Transport in Coulomb SystemsNuclear Matter, Correlations. Designing Storage for Exchange 2007 SP1-Pierre Bijaoui 2011-04-08 Designing Storage for Exchange 2007 SP1 will help you understand the new choices and possibilities available in designing your storage environment for Microsoft Exchange Server 2007 SP1. The move of Microsoft Exchange Server from a 32-bit application to the 64-bit world reduced the I/O footprint on the storage subsystem. This allows users to consider shared storage deployments or go the opposite way and focus on direct attached storage. Supporting large mailboxes is now possible, but how do you back up and recover the increased amount of data? Exchange Server 2007 Continuous Replication and new features in Windows Server 2008 Failover Clustering provides interesting possibilities for geographically dispersed deployments. This book explains these new built-in features of Exchange Server 2007 and compares them with application independent data replication solutions provided by high-end storage subsystems. It is critical to understand these key technologies to make the right decision which storage solution best fits your business needs. The authors share their experience from large scale deployments and depict configurations used during their projects. Includes a description of how the move to a 64-bit application reduced the I/O behavior Storage hardware technologies and Windows storage stack features for Exchange server Exchange Server 2007 Continuous Replication and Windows Server 2008 Failover Clustering Performance monitoring and analysis to optimize the Exchange Server 2007 configuration

<p>The Future of Religion in American Politics-Charles Dunn 2010-09-12 Should parents receive vouchers to send their children to religious schools? What limits—if any—should the government place on abortion? Should the government permit and fund stem cell research? Should religious organizations have the right to prohibit the employment of homosexuals? Should public schools teach both creationism and evolution? How does religion influence our political stances on gay marriage? The death penalty? Immigration? The issues are real. The emotions are intense. The solutions are difficult to reach and often problematic. From the White House to the courthouse, from governors’ mansions to the United States Supreme Court, religion factors into many contemporary legal controversies. Efforts to establish the proper balance between church and state create heated debates in America and raise seemingly insoluble questions. Politicians and their advisers walk a fine line when addressing religious issues in an increasingly pluralistic society where religious factions attempt to impose their values on the electoral and legislative processes. The Future of Religion in American Politics presents thoughtful, wide-ranging essays by twelve eminent public intellectuals and scholars, offering rich and stimulating views on one of the most divisive issues of our time. Editor Charles W. Dunn and the contributors assess the impact of religion on American politics in four distinct time periods: the founding, the Civil War, the New Deal era, and the modern era. Dunn out lines seven propositions that characterize the interaction of religion and politics during these time periods and describes how and why religion continues to influence politics in America. Contributors to this volume argue that whereas religion in the founding era held society together in a shared belief of the biblical portrayal of humanity, today’s pluralistic religious interpretations of God appear to be tearing society apart. The rise of Islam and other world religions poses perplexing questions about the issue of tolerance. Can America survive as a free society without commonly accepted morals that are based in religion? Is America a secular society with a clear separation of church and state, or a government created and informed by ever-changing religious values? The Future of Religion in American Politics includes essays about religion in the public square, evangelical, and faith-based politics in presidential elections. The authors investigate many thought-provoking questions about the extent of religious influence in the U.S. government today and its likely impact in the future. Lucid and accessible, this book covers a wide range of issues and will be invaluable to students of politics, religious studies, and history.</p>

<p>Making Sense of Japanese Grammar-Željko Cipriš 2002-04-30 Making Sense of Japanese Grammar explains in a lively and highly informative manner basic principles that underlie a wide range of phenomena in Japanese. Students--irrespective of proficiency level and linguistic training--will find clarification on matters of grammar that often seem idiosyncratic and Japanese-specific, such as avoiding the use of certain pronouns, employing the same word order for questions, hidden subjects, polite and direct forms. This volume may be used as a supplementary classroom reading or a helpful reference for students of all levels. Both students and instructors, even those trained in linguistics, will find its accessible explanations of grammatical concepts helpful</p>

<p>Where the Rekohu Bone Sings-Tina Makereti 2014-03-07 From the Chatham Islands/ Rekohu to London, from 1835 to the 21st century, this quietly powerful and compelling novel confronts the complexity of being Moriori, Maori and Pakeha. In the 1880s, Mere yearns for independence. Iraia wants the same but, as the descendant of a slave, such things are hardly conceivable. One summer, they notice their friendship has changed, but if they are ever to experience freedom they will need to leave their home in the Queen Charlotte Sounds. A hundred years later, Lula and Bigs are born. The birth is literally one in a million, as their mother, Tui, likes to say. When Tui dies, they learn there is much she kept secret and they, too, will need to travel beyond their world, to an island they barely knew existed. Neither Mere and Iraia nor Lula and Bigs are aware that someone else is part of their journeys. He does not watch over them so much as through them, feeling their loss and confusion as if it were his own.</p>
<p>Developing the New Learning Environment-Philippa Levy 2005 The academic librarian's role is changing rapidly. Increasingly the boundaries are blurring between librarians' jobs and those of learning technologists, information technologists, educational developers, skill support specialists and indeed academic staff. New collaborations and partnerships between staff with different professional backgrounds are emerging as part of the effort to enable active and independent learning amongst an increasingly diverse student community. Library and information professionals are becoming involved in the development and support of new modes of blended and distributed learning, including the development of e-learning approaches and resources, and new strategies for information literacy education. In this environment of rapid change the academic librarian needs to stay informed and embrace the new job opportunities emerging; this essential book will capture and critically discuss the librarian's changing learning support role in an education context providing guidance and practical support. Written by acknowledged experts across a broad range of roles in the new academic environment, this book will challenge thinking in this area as well as being practical and practice-based. The following key areas are covered: the policy framework pedagogies for a changing environment new literacies and learning key issues in the design and delivery of learning and teaching thinking differently about learning support new academic teams responding to the e-learning imperative information literacy education in practice inclusion: impact on practice managing learning support services visioning the future of learning support emerging professional identities and practices. Readership: This book will be essential reading for practitioners at every level within the higher education and further education sectors, including information specialists, learning support professionals, academic liaison co-ordinators and subject specialists, academic service managers and heads of library and information services. It will also be a valuable resource for all other professionals involved in the delivery of learning support, and for students of LIS and of education.</p>
