101 Shots-Kim Haasarud 2014-03-25 A gamut of shot recipes, from traditional shooters to grown-up shots made with market-fresh ingredients—from the author of 101 Tropical Drinks. Both classic and sophisticated shot recipes like you've never seen before. Forget what you think you know about shots from your

college years. In 101 Shots, cocktail aficionado Kim Haasarud elevates the lowly shot to heights never seen before in this collection of recipes just as she's done with her other books, including 101 Martinis and 101 Margaritas. For example, the Peach Fuzz Shooter, the Mini Bananas Foster, and the Archangel are made with fresh fruit purees. There are more traditional recipes as well, such as the Belfast Bomber made with Baileys and Irish whiskey dropped into a glass of Guinness, not to mention spicy offerings like the Yellow Sun Sangrita made with smoked paprika and Tabasco, and even savory ones like the Caprese Shooter made with tomatoes, basil, salt, pepper—and vodka, of course. What's perhaps best about shot recipes is that there is almost no occasion when they're not fun to serve and enjoy, from the Johnny Appleseed, a perfect drink for fall made with fresh cider, to the Red, White, and Blue, a layered concoction ideal for Independence Day parties. With gelée shot recipes, too, this may be the last party cocktail book you'll ever need.

Green Boating-Misse Wester 2009-04-14 The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

Narrative Inquiry in Music Education-Margaret S. Barrett 2009-03-17 Margaret S. Barrett and Sandra L. Stauffer We live in a "congenial moment for stories" (Pinnegar & Daynes, 2007, p. 30), a time in which narrative has taken up a place in the "landscape" of inquiry in the social sciences. This renewed interest in storying and stories as both process and product (as old text and research text) of inquiry may be attributed to various methodological and conceptual "turns," including the linguistic and cultural, that have taken place in the humanities and social sciences over the past decades. The purpose of this book is to explore the "narrative turn" in music education, to - amine the uses of narrative inquiry for music education, and to cultivate ground for narrative inquiry to seed and ourish alongside other methodological approaches in music education. In a discipline whose early research strength was founded on an alignment with thesocialsciences,particularlythepsychometrictradition,oneofthekeychallenges for those embarking on narrative inquiry in music education is to ensure that its use is more than

that of a “musical ornament,” an elaboration on the established themes of psychometric inquiry, those of measurement and certainty. We suggest that narrative inquiry is more than a “turn” (as noun), “a melodic embellishment that is played around a given note” (Encarta World English Dictionary, 2007, n. p.); it is more than elaboration on a position, the adding of extra notes to make a melody more beautiful or interesting.

The Traveler's Key to Ancient Greece-Richard G. Geldard 2000-05-01 The Eleusian mysteries, the Sanctuary of Apollo, the Theatre of Dionysus, the labyrinths of Knossos, the Delphic oracle--- the book leads us to such sacred sites in the ancient way of spiritual pilgrimage. "The gods have not totally vacated the holy places," says Richard Geldard. "Any 'vacating' has to do with our own lack of awareness." He brings to life the mythology that shaped the brilliance of Greek architecture and art, integrating rare historical material with the most recent archeological data. The result is a specialty guidebook comprehensive enough to be the only one you pack, with commentary on: Major and lesser sites of the palace and temple cultures; Greek drama, philosophy, art, and sculpture; Sacred geometry and architecture; Gallery collections in three major museums. Whether you're an armchair or actual traveler, Traveler's Key opens access to the fabled wisdom enjoyed by pilgrims of old and to the living mythology that still has power to transform lives.

Inspecting the Aging Sailboat-Don Casey 2004-08-17 ". . . the perfect place to begin, or continue, your education." --Sailing Whether you are shopping for a used fiberglass boat or prioritizing maintenance tasks on the one you already own, this book saves money--and perhaps even disaster. Narrative Soundings: An Anthology of Narrative Inquiry in Music Education-Margaret S. Barrett 2012-02-29 This volume focuses specifically on narrative inquiry as a means to interrogate research questions in music education, offering music education researchers indispensable information on the use of qualitative research methods, particularly narrative, as appropriate and acceptable means of conducting and reporting research. This anthology of narrative research work in the fields of music and education builds on and supports the work presented in the editors' first volume in Narrative Inquiry in Music Education: Troubling Certainty (Barrett & Stauffer, 2009, Springer). Into the Bermuda Triangle-Gian Quasar
2005-02-28 Still unsolved, still baffling, still claiming new victims. Here are the untold stories. A pilot reports a strange haze enveloping his plane, then disappears; eleven hours after fuel starvation, as if calling from a void, he is heard 600 miles away. He requests permission to land, then vanishes forever. A freighter steaming over placid seas disappears without a trace. A pleasure yacht ghosts past without a soul on board. A pilot calls for help because a "weird object" is harassing his plane. A jet collides with an "unknown" and is never found. . . . Into the Bermuda Triangle is the first comprehensive examination of these baffling disappearances in more than a generation. Drawing on official reports from the NTSB and other investigative agencies as well as interviews with scientists, theorists, and survivors, leading authority Gian Quasar not only sets the record straight on previously examined cases, he also offers a bulging file of new cases, the collective results of his twelve-year investigation. In meticulous detail this unflinching account: Documents confirmed disappearances of airplanes and ships Gathers new testimony and reexamines old interviews from eyewitnesses and survivors Explores possible explanations ranging from zero-point energy to magnetic vortices Challenges our assumptions with the sheer weight of accumulated evidence In this age of technological and scientific discovery, there are still mysteries that transcend understanding. The Bermuda Triangle is one. "The best book I've ever read on this important subject."—Andrew Griffin, *The Town Talk*

Refrigeration for Pleasureboats: Installation, Maintenance and Repair-Nigel Calder 1990-12-22 You've just spent a day on the water under a sweltering sun. You sit back,

enjoying the seclusion of a remote anchorage, lulled by the rattle of ice in your cold drink. A pretty picture, but a rare one aboard cruising boats. A house is never without its utility umbrella, but when you pull your boat's shore-power plug you're on your own. Even good refrigeration systems use a lot of energy. And bad ones? Erase those ice cubes from your tropical fantasy. Refrigeration for Pleasureboats explains how the cruising sailor can acquire the amenities--even the necessities--of an efficient onboard refrigeration system. Whether you're off for two days or two years, you must balance the highest possible cooling capacity with the lowest possible energy consumption. Calder explains clearly and logically how and why refrigeration components work, how to keep them working efficiently and economically, and what to look for when something goes wrong. Boat refrigeration

systems are phenomenally expensive. A modest refrigerator/freezer system, professionally built and installed, can cost more than \$4,000. Yet these units can still have unpleasant side effects--such as killing the boat's batteries. Refrigeration for Pleasureboats provides all the step-by-step information an amateur needs to design and build a custom refrigeration unit that will cost far less than half the price of an off-the-shelf unit and will likely run better with far less drain on the batteries. With Calder's maintenance and troubleshooting tips, you'll be able to keep it running for years to come and keep those ice cubes tinkling in that frosted glass.
