George the Painter: A Bathroom Reader-George Frizzell 2013-03-15 In spring of 2006, George Frizzell, aka George the Painter, agreed to write a monthly column for "The Horse/Backstreet Choppers" magazine. The column quickly became George's podium, his opportunity to expound on everything from the over-use of cell-phones to his personal demons and health issues. To say that George has a way with words is a huge understatement: "...Little did I realize but every injury that I endured from some bike related mishap that I miraculously walked away from was never really forgotten. All the drunken cartwheels that I experienced when I was launched from my saddle during some drug and alcohol induced stupidity would be held in escrow only to be paid for later down the road..." "George the Painter - A Bathroom Reader," is five years worth of George's columns, roughly 75,000 words - and an additional 48 pages of color photos. And whether the topic is motorcycles, the posers who ride them or his recent trip from Arizona to the East Coast, the prose is entertaining and truly unique. George has a huge following, and after reading just a small sample of his writing, it's easy to see why.

The Bart Markel Story-Joe Scalzo 1972-01-01

The Moto Guzzi Story - 3rd Edition-Ian Falloon 2018-08-21 The story of Moto Guzzi is a story of survival. As one of Italy's oldest, and most legendary marques, Moto Guzzi had seen the height of success during the 1930s, and then the 1950s when they dominated 250 and 350cc Grand Prix

racing. Their withdrawal from racing coincided with a period of stagnation until the company was sold to De Tomaso in 1973. During the 1970s the V7 Sport and Le Mans were at the forefront of the new superbike era, and later, with Dr John Wittner's help, embraced contemporary technology with the 1000cc Daytona. If one aspect characterizes Moto Guzzi it is continuity. The great 500cc Falcone single ran from 1950 until 1976, and the V7, originally seeing the light of day in 1967, continued well into the 2010s. This continuity breeds loyalty, and Guzzi owners are a fiercely proud breed. Guzzis are not like other motorcycles, even Italian ones, and to qualify as a Guzzi owner requires a dedication and individuality that will be rewarded in a long term relationship.

50 Ways to Improve Your Weather Forecasting-Dag Pike 2013-08-11

This is a book about practical weather forecasting, and it starts where most other books finish. Weather forecasts give you a lot of information about the weather to come but they often leave out a lot of the detail, and the timing of changes can also be vague. In this book, Dag Pike shows how to translate the basics into practical weather forecasts so that you can work out what it will be like in your area and along your proposed route. Sailors will be able to make better use of the available wind and avoid difficult areas, whilst powerboat drivers more interested in the sea conditions will be able to find the smoothest waters for a better ride. With the help of this book, readers will pick up expert tips such as Predicting the weather at sea from scanty weather forecasts Knowing what conditions to expect when near cliffs, river estuaries and valleys Understanding how the wind affects tides 50 Ways to Improve Your Weather Forecasting distils Dag Pike's experience gained from over 50 years of driving a whole range of craft from high-speed powerboats and lifeboats to ships and sailing boats. Written by one of the most experienced seamen in the world, it is your passport to practical weather forecasting techniques that will get you safely to your destination whether in fine weather or foul.

Semantic Service Provisioning-Dominik Kuroпка 2008-04-19 Service-oriented computing has recently gained extensive momentum in both industry and academia, and major software vendors hook on to the service paradigm and tailor their software systems towards services in order to accommodate ever-changing process and product requirements in today's dynamic market environments. While dynamic binding of services at runtime was identified as a core functionality of service-based environments as far back as 2000, its industrial-strength implementation has yet to be achieved. The main reason for this is the lack of rich service specifications, concepts, and tools to process them. This book introduces advanced concepts in service provisioning and service engineering, including semantic concepts, dynamic discovery and composition, and illustrates them in a concrete business use case scenario. To prove the validity of the concepts and technologies, a semantic service provisioning reference architecture framework as well as a prototypical implementation of its subsystems and a prototypical realization of a proper business scenario are presented. Thus the book goes way beyond current service-based software technologies by providing a coherent and consistent set of technologies and systems functionality that realizes advanced concepts in service provisioning. Both the use case scenario and the provisioning platform have already been substantiated and implemented by the EU-funded Adaptive Services Grid project. The book therefore presents state-of-the-art research results that have already passed a real industrial implementation evaluation which is based on the work of over 20 European partners cooperating in the field of semantic service provisioning.
